BIT Global
Crypto Leaders R-III (EUR)

WKN: A3DV7M ISIN: DE000A3DV7M2

Investment strategy

The BIT Global Crypto Leaders fund is an actively and independently from a benchmark managed equity fund that invests in companies in the blockchain and crypto sector. The Fund aims to achieve positive performance over the recommended investment horizon of at least ten years by selecting innovative growth companies that offer essential products and services in the blockchain and crypto sector. This is supplemented with an exposure of up to 25% of crypto assets via ETPs. The Fund's investment team works with a structured investment process that incorporates classic, bottom-up fundamental analysis and innovative use of alternative data sources to assess the value of a stock. The Fund's investment strategy is focused on selecting stocks and crypto assets that have the potential to multiply in value over the next few years.

Commentary as of 31.05.2026

The fund returned 36.5% in May. The Iran conflict pushed bond yields higher and, together with a stronger US dollar, exerted pressure on liquidity-sensitive assets. Bitcoin corrected in this environment but did not drag the broader market with it: declining cross-correlations allowed for idiosyncratic outperformance across select positions. The confirmation of Kevin Warsh as the new Fed Chair dampened rate hike expectations despite elevated inflation readings. Towards month-end, the probability of a US-Iran deal increased, making the outlook for June more constructive.

Hyperliquid (HYPE) was a significant performance contributor: HYPE reached a new all-time high of ~\$64, supported by its buyback mechanism and the successful launch of the first US spot ETFs on 12 May, through which over 1% of circulating supply has already been absorbed. NEAR Protocol (NEAR) was the strongest performer in the universe, generating over \$19 billion in volume through NEAR Intents at ~\$32 million in fees, with the upcoming Dynamic Resharding upgrade serving as a further catalyst. On the equities side, strong quarterly results from Nvidia (NVDA) reaffirmed the AI infrastructure thesis; IREN Ltd. (IREN), Hut 8 Corp (HUT) and TeraWulf (WULF) contributed positively through capacity expansions and hyperscaler contract announcements.

The portfolio remains focused on idiosyncratic AI and DeFi positions with structural growth catalysts.

Disclaimer

This is a marketing material.

Please read the prospectus and the key information document (PRIIPs KID) before making a final investment decision. Legal basis of the investment in the fund is the PRIIPs KID, the currently valid prospectus, the most recent audited annual report and the most recent unaudited semi-annual report. The aforementioned documents are available free of charge in German from Hansainvest (Hanseatische Investment-GmbH), Kapstadtring 8, 22297 Hamburg (check <https://fondswelt.hansainvest.com/de/fondswelt/fondsuebersicht>). Risks can be found in the prospectus. The PRIIPs KID must be made available prior to the investment. The tax treatment depends on the individual circumstances of each investor. This marketing material is for information purposes only and does not constitute a solicitation to buy or sell shares of the fund. In particular, the recipient is recommended, if necessary with the assistance of an advisor, to check the information with regard to its compatibility with one's own personal circumstances, legal, regulatory, tax and other consequences. No assurance can be made that the investment objectives will be achieved. This marketing material is directed exclusively to interested parties in countries in which the fund is authorized for public distribution.

The fund was established under German law and is authorized for distribution in Germany, Austria and Switzerland. The fund may not be publicly offered for sale in the United States of America or for the benefit of U.S. persons.

Past performance, simulations or forecasts are not a reliable indicator for future performance. The gross performance according to the BVI method does not take into account the costs charged on issuance and redemption of shares (subscription fee and redemption fee) and fees incurred during the holding period (e.g. transaction costs). If an investor wants to invest shares for EUR 1,000.00, with a subscription fee of 5% the investor must pay EUR 1,050.00. The investor may incur custody costs and other costs, which reduce the performance. It should be noted that the value of the acquired shares may fluctuate due to fluctuation in the underlying investments of the fund and the listing of the securities.

Opportunities & Risks

Opportunities: Crypto-Assets and crypto-technology stocks have high return potential in the long term. With a successful selection of individual stocks, there is the opportunity to generate additional returns through active management while avoiding total losses. The increasing application possibilities of blockchain and the increasing acceptance of crypto assets offer opportunities to benefit from the winners of the crypto market in the long term with this fund.

Risks: The fund actively invests in high-growth crypto-technology companies and crypto-assets and may therefore be subject to relevant fluctuations in value. The fund is managed independently from a benchmark. The crypto sector may underperform relative to the market. Due to the concentration on a small number of individual stocks and crypto assets, the fund's performance is heavily dependent on the performance of individual securities. Although the fund aims to achieve steady growth in value, this cannot be guaranteed. The possible investment in securities based on crypto assets leads to an increased risk of loss. This implies that the value of the securities and therefore the fund price can also fluctuate significantly. There is a risk that the fund price may fall sharply and negatively over the long term, causing investors to suffer high losses (up to the total loss of the invested capital). Investors should have understood these risks before making an investment decision to invest. Investments in this fund are suitable for investors with a long investment horizon and a corresponding willingness and ability to take risks.

Please read the sales prospectus, mainly the risk information within the sales prospectus, to overview all opportunities and risks.

BIT Capital - Berlin Investment Technologies

BIT Capital is an asset manager combining the expertise of an industry leader in asset management with the agility and drive of a young technology company. The actively managed equity and crypto funds empower investors to benefit from both mass-market potential of established technologies and the high growth potential of emerging technologies and their adoption leaps.
