1. FUND INFORMATION

Description

Lyxor Asset Management Group ("Lyxor") was founded in 1998 and comprises two subsidiaries (1) (2) of Société Générale group. Lyxor benefits from the expertise of 600 professionals across the wealth management world, advising EUR 117.6 billion* in assets. Lyxor offers bespoke asset management services, capitalising on its know-how in ETFs and indexing, Alternative and Multi Management, and Absolute Performance and Solutions. As one of the most experienced players on the market, Lyxor ETF is Europe's number three provider of ETFs (number two in terms of liquidity (3)), with AuM of more than EUR 49.8 billion*. With 220 ETFs listed on 13 financial marketplaces, Lyxor ETF provides investors with varied investment solutions enabling them to diversify their allocation across the entire spectrum of asset classes (equities, bonds, money market instruments and commodities via forward financial instruments). Demonstrating its commitment to high-quality ETFs, in 2011, Lyxor ETF implemented an ETF quality charter with the aim of ensuring that each ETF it offers complies with the strictest requirements in terms of replication quality, risk monitoring, liquidity and transparency. www.lyxoretf.com

Investment objective

The LYXOR IBEX 35 DOBLE APALANCADO DIARIO UCITS ETF - C-EUR is a UCITS compliant exchange traded fund that aims to track the benchmark index Ibox 35 Doble Apalancado Neto.

The IBEX 35 DOBLE LEVERAGE offers double exposure to the daily return on the IBEX 35 through the investment of an initial capital plus an equivalent loaned capital. IBEX 35 is the domestic and international benchmark for the Spanish Stock Market. It is made up of the 35 most liquid securities traded on the Spanish Stock Market. A positive daily return on the IBEX 35 yields an also positive return but double that amount for the IBEX 35 DOBLE LEVERAGE and vice versa. The IBEX indices are Euro-denominated and calculated in real-time within the European time zone.

Risk Factors

It is important for potential investors to evaluate the risks described below and in the fund prospectus which can be found on www.lyxoretf.com
CAPITAL AT RISK: ETFs are tracking instruments: Their risk profile is similar to a direct investment in the Underlying Index. Investors' capital is fully at risk and investors may not get back the amount originally invested.

REPLICATION RISK: The fund objectives might not be reached due to unexpected events on the underlying markets which will impact the index calculation and the efficient fund replication.

COUNTERPARTY RISK: Investors are exposed to risks resulting from the use of an OTC Swap with Societe Generale. In-line with UCITS guidelines, the exposure to Societe Generale cannot exceed 10% of the total fund assets. Physically replicated ETFs may have counterparty risk resulting from the use of a Securities Lending Programme.

UNDERLYING RISK: The Underlying Index of a Lyxor ETF may be complex and volatile. When investing in commodities, the Underlying Index is calculated with reference to commodity futures contracts exposing the investor to a liquidity risk linked to costs such as cost of carry and transportation. ETFs exposed to Emerging Markets carry a greater risk of potential loss than investment in Developed Markets as they are exposed to a wide range of unpredictable Emerging Market risks.

CURRENCY RISK: ETFs may be exposed to currency risk if the ETF is denominated in a currency different to that of the Underlying Index they are tracking. This means that exchange rate fluctuations could have a negative or positive effect on returns.

LIQUIDITY RISK: Liquidity is provided by registered market-makers on the respective stock exchange where the ETF is listed, including Societe Generale. On-exchange liquidity may be limited as a result of a suspension in the underlying market represented by the Underlying Index tracked by the ETF; a failure in the systems of one of the relevant stock exchanges, Societe Generale or other market-maker systems; or an abnormal trading situation or event.

Units of a specific UCITS ETF managed by an asset manager and purchased on the secondary market cannot usually be sold directly back to the asset manager itself. Investors must buy and sell units on a secondary market with the assistance of an intermediary (e.g. a stockbroker) and may incur fees for doing so. In addition, investors may pay more than the current net asset value when buying units and may receive less than the current net asset value when selling them. Updated composition of the product's investment portfolio is available on www.lyxoretf.com. In addition, the indicative net asset value is published on the Reuters and Bloomberg pages of the product, and might also be mentioned on the websites of the stock exchanges where the product is listed.

There is no guarantee that the fund's objective will be met. The fund may not always be able to replicate exactly the performance of the index (or indices).

This product includes a risk of capital loss. The redemption value of this product may be less than the amount initially invested. In a worst case scenario, investors could sustain the loss of their entire investment.
