KEY INVESTOR INFORMATION

This document provides you with key investor information about this Fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this Fund. You are advised to read it so you can make an informed decision about whether to invest.

Aviva Investors Managed High Income Fund, Class 8, Distribution shares, GBP, a sub-fund of the Aviva Investors Investment Funds ICVC (ISIN: GB0004475223). The Fund is managed by Aviva Investors UK Fund Services Limited.

OBJECTIVES AND INVESTMENT POLICY

Objective: The Fund will invest in bonds issued by companies and aims to provide an income of at least 110% of the income return of the benchmark, and an overall net return greater than the benchmark over the long term (5 years or more).

The benchmark (the "Index") is a composite index, as detailed below.

Core investment: At least 80% of the Fund will be invested in bonds globally (including those issued by governments and supranational organisations) issued in Sterling or hedged to Sterling, including exposure to emerging markets. A maximum of 70% of the Fund may be invested in sub-investment grade bonds, which have been independently rated as sub-investment grade with a credit rating below BBB-/Baa3.

Sub-investment grade bonds are typically regarded as being of lower quality than "investment grade" bonds, but typically offer a higher yield.

Other investments: The Fund may also invest in other bonds, shares of companies, other funds (including funds managed by Aviva Investors companies), cash and deposits.

Derivatives, such as futures, may be used from time to time, to gain a particular market exposure which would otherwise be difficult or costly to achieve, or to manage the Fund's cash flows in a cost-effective manner. Derivatives may also be used to reduce risk, such as foreign currency risk within the Fund, which is hedged using Forward Foreign Exchange contracts. This type of derivative usage is called "efficient portfolio management".

Strategy: The Fund is actively managed with a flexible investment allocation approach across global bond markets. The Investment Manager will make high conviction (strong belief) investments at both a company and sector level, basing their investment selection process on a long-term outlook, whilst looking to deliver optimum risk adjusted-returns. The Investment Manager will focus on identifying what they judge to be higher quality investment grade or sub-investment grade bonds through assessment of the business strengths and risks associated with the underlying companies, the valuation of the bonds relative to the market, the views of independent risk rating agencies, and any other relevant factors, whilst also taking advantage of short-term opportunities when they arise.

This Fund is subject to Aviva Investors' baseline exclusion policy **– please see Appendix 2 of the Prospectus for information on these limited investment restrictions.**

Performance & Risk Measurement: The Fund's performance is measured against the Index, a composite benchmark of 50% Bloomberg Global Aggregate Corporate Index (GBP Hedged), 40% Bloomberg Global High Yield Index ex CMBS ex EMG 2% Issuer Capped (Sterling Hedged) and 10% JPM® Emerging Markets Bond Index (Sterling Hedged) after charges and taxes, whilst the income target is measured before charges and taxes.

The Fund does not base its investment process upon the Index, which is only a representation of the investment universe, therefore the Fund will hold bonds that are not part of the Index, and will only hold a relatively small proportion of bonds relative to the number in the Index.

The Index represents the performance of a broad range of global bonds (approximately 19,000).

The Index has been selected as a benchmark for performance measurement because it is representative of the type of bonds in which the Fund is likely to invest, and it is therefore an appropriate measure for the Fund's performance. In addition to the Index, the Fund's financial performance can be compared against the average performance of the Investment Association Sterling Strategic Bond sector (the "Performance Sector"). The Performance Sector has been chosen because it reflects the aggregate performance and characteristics of other funds with similar objectives and constraints. The Fund is not constrained by or managed by the Performance Sector.

Recommendation: this Fund may not be appropriate for investors who plan to withdraw their money within 5 years.

Other information: You can buy and sell shares on any London business day.

This is an income share class and any distributions from the Fund will be paid to you.

For full investment objectives and policy details please refer to the Prospectus.

RISK AND REWARD PROFILE

1	2	3	**4**	5	6	7

Lower risk — **Higher risk**

Typically lower rewards — Typically higher rewards

This indicator is based on historical data, calculated using European Union rules, and may not be a reliable indication of the future risk profile of the Fund.

The risk and reward category shown is not guaranteed to remain unchanged and may change over time. The lowest category does not mean 'risk free'.

The value of investments and the income from them will change over time.

The Fund price may fall as well as rise and as a result you may not get back the original amount you invested.

The Fund has been allocated a risk number based on the historic volatility of its share price or where insufficient information is available appropriate asset classes.

Convertible bonds risk: Convertible bonds could earn less income than comparable debt securities and less growth than comparable equity securities, and carry credit, default, equity, interest rate, liquidity and market risks.

Counterparty risk: The Fund could lose money if an entity with which it does business becomes unwilling or is unable to meet its obligations to the Fund.

Credit risk: A bond or money market security could lose value if the issuer's financial health weakens.

Below investment grade bonds (also known as high yield securities) typically have greater credit risk than investment grade securities.

Default risk: Issuers of certain bonds or money market instruments could become unable to make payments on their bonds, causing a reduction in income to the Fund and also in the value of bonds held by the Fund. Under extreme market or economic conditions, defaults could be widespread and their effect on Fund performance significant.

Derivatives risk: Derivatives are instruments that can be complex and highly volatile, have some degree of unpredictability (especially in unusual market conditions), and can create losses significantly greater than the cost of the derivative itself.

Fixed Income Risk: Investments in fixed interest securities are impacted by market and credit risk and are sensitive to changes in interest rates and market expectations of future inflation. Bonds that produce a higher level of income usually have a greater risk of default.

Illiquid securities risk: Certain assets held in the Fund could, by nature, be hard to value or to sell at a desired time or at a price considered to be fair (especially in large quantities), and as a result their prices could be very volatile.

Interest rate risk — bonds: When interest rates rise, bond values generally fall. This risk is generally greater for longer-term bonds and for bonds with higher credit quality.

Income Risk: The investment objective of a Fund is to generate income, at times this may limit opportunities for capital growth.

Full information on the risks applicable to the Fund is detailed in the Prospectus.

CHARGES

One-off charges taken before or after you invest

Entry charge	None
Exit charge	None

Charges taken from the Fund over a year

Ongoing charges	0.02%

Charges taken from the Fund under certain specific conditions

Performance fee	None

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

The entry and exit charges shown are the maximum that might be taken out of your money before it is invested / before the proceeds of your investment are paid out.

The ongoing charges figure is based on last year's expenses for the year ending November 2025. The figure for ongoing charges excludes performance fees and portfolio transaction costs, except in the case of an entry/exit charge paid by the Fund when buying or selling units in another collective investment undertaking.

For more information about charges please see the charges sections of the Fund's Prospectus.
