This fund is managed by Coronation Global Fund Managers (Ireland) Limited

Objectives and Investment Policy

The Fund will endeavour to achieve long term return primarily through investment in equities in global emerging markets.

The Fund's benchmark is the MSCI Global Emerging Markets Index.

The Fund will invest principally in emerging market equity securities listed or traded on recognised exchanges.

The Fund is actively managed and the Investment Manager has a high level of discretion over how to allocate investments among permissible asset classes. Performance will be measured against the specified benchmark but the intention is not to track it.

The Fund may use instruments such as financial derivative instruments for the purposes of efficient portfolio management and may employ forward currency exchange contracts to align the various currency exposures of the underlying assets of the Fund with the total currency exposure of the Fund's benchmark.

Class A does not pay a dividend. Any income arising is retained in the Fund and reflected in the value of the share class.

Units in the Fund can be purchased or sold each business day apart from Irish public holidays. Applicable documentation needs to be provided to the fund administrator by 5pm (Irish time) on the business day prior to the dealing day.

The Indicator is based on historical data and may not be a reliable indication of the future risk profile of the fund. The risk category shown is not guaranteed and may change over time. A risk indicator of "1" does not mean that the investment is risk free. The indicator is not a measure of the possibility of losing your investment.

The Fund is in category 7 as this represents the level of volatility the Fund is exposed to which is reflective of the objectives and investment policy which are detailed above.

Liquidity Risk: Not all securities or instruments invested in by the Funds will be listed or rated. This may lead to difficulties when valuing and buying/selling the instrument.

Counterparty Risk: The Fund will have credit exposure to counterparties by virtue of Over the Counter Transactions. These instruments are non exchange traded and the counterparty is the firm involved in the transaction. If the counterparties experience financial difficulty and are not able to make payments to the Fund when due, the Fund could lose part or all of the amounts at which the assets have been included in the valuation of the Fund.

Currency Risk: Assets of the Fund may be based in a currency other than the base currency of the Fund and changes in exchange rates between the base currency and the currency of the asset may result in an increase or decrease in the value of the Fund.

Emerging Markets Risk: Investing in emerging market securities involves a higher degree of risk. Such risks may include but are not limited to political, economic and social instability, small market sizes with limited liquidity and less developed legal structures.
