The PRIIP Manufacturer and the Management Company is Waystone Management Company (IE) Limited which is authorised in Ireland and supervised by the Central Bank of Ireland (CBI).

This Key Investor Information is accurate as at 31 January 2025

What is this product?

Type: This product is an open ended physically backed exchange traded fund.

Objectives: The investment objective of the product is to deliver the performance of the Bloomberg EM Tradable Russian Corporate Bond (EMRUS) Index (the "Benchmark Index") less fees and expenses. Accordingly, the performance of the Fund will be indexed against the Benchmark Index's performance i.e. the performance of the Fund will be dependent on the performance of the Benchmark Index.

Intended investor: The typical investor is aware of the risks involved in trading emerging market fixed income securities and is seeking a medium to long term return.

Term: The Fund is open-ended and has no maturity date. Subject to the liquidation, dissolution and termination rights of the board of the Fund as set forth in the Fund prospectus, the Fund cannot be automatically terminated. The PRIIP Manufacturer, Waystone Management Company (IE) Limited, is not entitled to terminate the product unilaterally.

What are the risks and what I get in return?

The risk indicator assumes you keep the product for 5 years. The actual risk can vary significantly if you cash in at an early stage and you may get back less.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this product as 6 out of 7, which is a "high" risk class. This rates the potential losses from future performance at a high level, and poor market conditions could result in the loss of some or all of your investment. This product does not include protection against future performance. **Be aware of currency risk** If you receive payments in a currency different to the base currency, your final return depends on the exchange rate between the two currencies. This risk is not considered in the above indicator.

Investment Performance Information?

Returns in relation to the fund are dependent on the performance Eurobonds issued by Russian corporate entities. The performance Russian corporate bonds can be affected by a number of factors including, but not limited to, underlying company performance, corporate actions, credit agency ratings, interest rates, geopolitical uncertainty and general market sentiment. If the trading currency differs from the base currency, USD, the performance will also be affected by the trading currency and base currency exchange rate.

What could affect my return positively?

An increase in the corporate bond prices and/or receiving coupons payments.

What could affect my return negatively?

A decrease in the corporate bond prices and/or defaulting corporate bonds.

What happens if Waystone Management Company (IE) Ltd is unable to pay out?

The Management Company has no obligation to pay out since the Fund design does not contemplate any such payment being made. You are not covered by any national compensation scheme. To protect you, the assets are held with a separate company, a depositary. Should the Fund default, the depositary would liquidate the investments and distribute the proceeds to the investors. In the worst case, however, you could lose your entire investment.

Performance Scenarios

The figures below assume an initial investment of \$10,000 and include all the costs of the product. The actual performance depends on future market performance which cannot be accurately predicted.

Scenario		1 year	3 years	5 years
Stress Scenario	What you might get back after costs	5,399	58	6
	Average return each year	-46.01%	-82.05%	-77.41%
Unfavourable Scenario	What you might get back after costs	8,586	1,212	301
	Average return each year	-14.14%	-50.51%	-50.39%
Moderate Scenario	What you might get back after costs	9,632	3,482	1,747
	Average return each year	-3.68%	-29.65%	-29.45%
Favourable Scenario	What you might get back after costs	10,452	8,325	9,611
	Average return each year	4.52%	-5.93%	-0.79%

The stressed scenario shows what you might get back in extreme market circumstances. The unfavourable, moderate and favourable scenarios are indications of the worst, average and best performance of the product over the last 5 years.

What are the costs?

The Reduction in Yield (RIY) shows what impact the total costs you pay will have on the investment return you might get. The total costs take into account ongoing costs. The amounts shown here are the cumulative costs of the product itself, for three different holding periods. They include potential early exit penalties. The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest and how long you hold the product. The amounts shown here are illustrations based on an example investment amount and different possible investment periods. We have assumed in the first year you would get back the amount that you invested (0% annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario. The figures assume you invest USD 10,000. The figures are estimates and may change in the future.

Ongoing costs

Scenarios	If you cash in after 1 year	If you cash in after 3 years	If you cash in after 5 years
Total Costs (USD)	50	78	99
Impact on return (RIY) per year	0.50%	0.50%	0.50%

Total Expense Ratio (TER) for this instrument is 0.005. TER is an overall indicator which includes all of the fund's costs (depository costs, audit, etc.). The TER affects the market price of the security and does not have to be paid separately by investor.

Composition of costs

Category	Type	Cost	Description
One-off Costs	Entry costs	0%	This product does not have entry costs
	Exit Costs	0%	This product does not have exit costs
Recurring Costs	Portfolio transaction costs	0.73%	This is an estimate based on the cost of buying and selling the portfolio's securities over the last three years
	Other ongoing costs	0.50%	The impact of the costs that we take each year for managing your investments
Incidental Costs	Performance fees	0%	This product does not have any performance fees
	Carried interest	0%	This product does not have any carried interest

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

How long should I hold it and can I take money out early?

Recommended holding period: 5 years

This product has no required minimum holding period but is designed for long term investment; you should be prepared to stay invested for at least 5 years. You can sell the product on a secondary market through a broker.
