

Global X FinTech UCITS ETF (FINX)

USD Accumulating Share Class
As of 31 Mar 2023

KEY FEATURES

All information below correct as of 31 March 2023

High Growth Potential

In 2020, the number of active online banking users was approaching 1.9bn worldwide. Forecasts suggest that number could reach 2.5bn by 2024, highlighting the vast reach in just one segment of this theme (Source: "Number of Active Online Banking Users Worldwide" Statista, Oct 2021).

Global Tailwinds

FinTech is a global theme, poised to benefit as expanding broadband and mobile internet penetration coincide with a rising middle class in developing markets, historically under-served by traditional financial services.

Changing Consumer Preferences

While FinTech companies have historically catered to the digital preferences of younger consumers, they are increasingly competing on cost and convenience across a range of more established industries like lending and insurance.

Capital at Risk. All financial investments involve an element of risk. Therefore, the value of your investment and the income from it will vary and your initial investment amount cannot be guaranteed.

Performance is based on the fund's NAV and is shown on a total return basis (i.e., with gross income reinvested, where applicable). The fund's NAV may differ from its market price and, as a result, individual shareholders may realize returns that are different from the NAV performance. Cumulative return is the aggregate amount that an investment has gained or lost over time. Annualised return is the average return gained or lost by an investment each year over a given time period.

The performance data quoted represents past performance. Past performance does not guarantee future results. The investment return and principal value of an investment will fluctuate so that an investor's shares, when sold or redeemed, may be worth more or less than their original cost and current performance may be lower or higher than the performance quoted. High short-term performance, when observed, is unusual and investors should not expect such performance to be repeated. The return of your investment may increase or decrease as a result of currency fluctuations if your investment is made in a currency other than that used in past performance calculations.
