Money Market | Factsheet as of 31 May 2026

This is a marketing communication. Please refer to the offering documents before making any final investment decisions.

Risk Considerations

INVESTMENT INVOLVES RISKS. The value of the Fund can be volatile and investors may not get back the amount originally invested. Past performance is not indicative of future results.

- Franklin U.S. Dollar Short-Term Money Market Fund invests principally in high quality Money Market Instruments which consist primarily of short-term fixed and floating-rate debt securities, commercial papers, floating-rate notes and certificates of deposit of credit institutions.
- The Fund is subject to debt securities risk, market risk, underlying investment funds risk, credit risk, liquidity risk, valuation risk, volatility risk, concentration risk, counterparty risk, securitisation risk, repurchase and reverse repurchase transactions risk and derivative instruments risk.
- The Fund may at its discretion pay dividends out of the capital or out of gross income of the Fund while paying all or part of the Fund's fees and expenses out of the capital of the Fund, which results in effectively paying dividends out of capital. Payment of dividends out of capital amounts to a return or withdrawal of part of an investor's original investment or from any capital gains attributable to that original investment. Any distributions involving payment of dividends out of the Fund's capital or payment of dividends effectively out of the Fund's capital (as the case may be) may result in an immediate reduction of the net asset value per share.
- Investors should not invest based on this marketing material alone. Offering documents should be read for further details, including the risk factors. Before you decide to invest, you should make sure the intermediary has explained to you that the Fund is suitable to you.

Past performance does not predict future returns.

Glossary

Comparator: Benchmark is used for comparing Fund performance, but is not a constraint to Fund Investment. **Weighted Average Maturity** is the weighted average maturity at issue of the underlying holdings, on a market value basis, expressed in days. **Weighted Average Life:** The average number of days or years to maturity for the underlying holdings. **Standard Deviation:** Measure of the degree to which a fund's return varies from the average of its previous returns. The larger the standard deviation, the greater the likelihood (and risk) that a fund's performance will fluctuate from the average return. **Charges:** For a comprehensive list of the types of costs deducted from fund assets, see the offering documents.

Performance information is based on the stated share class only, in Fund Currency, NAV to NAV, taking into account of dividend reinvestments and capital gain or loss.

When performance for either the portfolio or its benchmark has been converted, different foreign exchange closing rates may be used between the portfolio and its benchmark.

Diversification: Up to 100% of the investments of the Franklin U.S. Dollar Short-Term Money Market Fund may be issued or guaranteed by sovereign governments of member states of the OECD, supranational entities, including most prominently instruments issued or guaranteed by the United States Government and its agencies and/or related entities, including but not limited to, the United States Treasury, the U.S. Federal Reserve, the Federal National Mortgage Association (FNMA), the Government National Mortgage Association (GNMA), and the Federal Home Loan Mortgage Corporation (Freddie Mac), the Federal Home Loan Banks (FHLB), and supranational organisations that the United States and at least one EU Member State participate in, including but not limited to the International Bank for Reconstruction and Development (IBRD or World Bank), the International Finance Corporation (IFC), and the Inter-American Development Bank (IADB). In addition to receiving a favourable assessment of their credit quality pursuant to the Management Company's internal credit quality assessment procedure, all investments at the time of purchase shall have a minimum long-term rating of A or better by Standard & Poor's Corporation ("S&P") or Moody's Investors Service, Inc. ("Moody's") or similar rating by any other internationally recognised statistical rating organisation, corresponding to a short-term rating of A-1 by S&P/P-1 by Moody's or equivalent or, if unrated, be declared to be of comparable quality by the Investment Manager.

The Franklin U.S. Dollar Short-Term Money Market Fund is a short-term variable NAV money market fund and as such is not a guaranteed investment; is different from an investment in deposits since the principal amount invested may fluctuate; does not rely on external support for guaranteeing the liquidity or maintaining a stable NAV per share; and any loss of principal is borne by the investor.

Hedged share classes will attempt to hedge the currency risk between the base currency of the Fund and the currency of the share class, although there can be no guarantee that it will be successful in doing so. In some cases, investors may be subject to additional risks.
