### Key benefits

#### Monthly Rebalancing

Monthly rebalancing to reflect the development of the crypto market, where the allocation of each crypto asset is adjusted. In conjunction with the rebalancing, existing crypto assets may be excluded and new ones may be added to the portfolio.

#### Diversification

Investing in a top 10 crypto basket portfolio allows investors to spread their risk across multiple crypto assets, reducing the risk associated with investing in any single crypto asset.

#### Weighted by market cap

Each crypto asset's weight in the index is based on its market capitalization, with larger assets receiving a higher allocation, capped at a maximum weight of 40% per asset to promote diversification. Only crypto assets in the Nasdaq Crypto Index Europe are included, and weights are rebalanced monthly to reflect market conditions.
