

Virtune Crypto Altcoin Index ETP

Virtune Crypto Altcoin Index ETP is a physically-backed exchange-traded product (ETP) designed to offer investors a secure and cost-effective way to gain exposure to Virtune Crypto Altcoin Index (VIRALTI). This is made possible through a transparent and physically-backed structure with institutional-level security.

Key benefits

Monthly Rebalancing

Monthly rebalancing where the allocation of each crypto asset is adjusted to be equally weighted. During rebalancing, the weights of crypto assets that have performed strongly are reduced, and the weights of crypto assets that have performed weakly in relation to each other are increased. In conjunction with rebalancing, existing crypto assets may be excluded, and new ones can be added to the index.

Diversification

Investing in an altcoin index allows investors to gain broad exposure to the crypto market and spread their risk across several crypto assets, excluding Bitcoin and Ethereum, thus reducing the risk associated with investing in a single cryptoasset asset.

Equally weighted holdings

The crypto assets are equally weighted, meaning that each crypto asset is evenly distributed in the index. This strategy allows for increased exposure to less established altcoins, providing greater diversification and broader exposure, but also higher volatility.

Product statistics

Assets under managements	\$8,956,793.00
Units Outstanding	11,685,000.00
NAV per unit	\$0.77
Inception date	4 November 2024
