

Virtune Stellar ETP

Virtune Stellar ETP is a physically-backed exchange-traded product (ETP) designed to offer investors a secure and cost-effective way to gain exposure to Stellar (XLM). This is made possible through a transparent and physically-backed structure with institutional-level security.

Key benefits

Stellar

XLM is a digital asset developed to enable fast, low-cost international payments, particularly focused on serving unbanked populations and facilitating currency exchange. It operates on the decentralized Stellar network, which allows for efficient cross-border transactions between individuals, financial institutions, and payment systems.

Trade as easily as a stock

This product allows you to invest in XLM in as straightforward a manner as trading a stock through your online broker. Your investment in XLM is managed alongside your other securities investments. Additionally, the product can be held in your ISK (Investeringssparkonto) or capital insurance, potentially providing tax advantages.

Regulated investment product

Virtune Stellar ETP provides exposure to XLM through a 100% physically backed and regulated investment product listed on regulated European markets. Coinbase, the global leader in institutional custody solutions, serves as the custodian for securely storing XLM in cold-storage.

Product statistics

Assets under managements	\$1,083,235.00
