RNDR

21Shares Render ETP

Factsheet as of 06 May, 2025[1]

Investment Objective

100% physically backed by the underlying assets, the 21Shares Render ETP (RNDR) tracks the performance of Render, the native token powering the Render Network. This ETP provides investors with a regulated and transparent way to gain exposure to the rapidly growing decentralized GPU rendering network, which leverages distributed computing power to transform digital content creation and overcome scalability limitations in AI, VR, and other computationally intensive fields.

Benefits

Unleashing the Power of GPUs

Render unlocks the potential of underutilized decentralized GPU resources, overcoming the limitations of centralized data centers and delivering unmatched scalability and efficiency.

Multi-Functional Token

Render acts as a medium of exchange for rendering services, incentivizes GPU node operators, and supports governance to power various industries.

100% physically backed

The 21Shares Render ETP is 100% physically backed by the underlying digital assets which are kept in cold storage by an institutional-grade custodian, offering greater protection than custody options available to individual investors.

Climate protection

21Shares has engaged in effective climate protection since 2021. Our contributions support climate protection projects that include cleaner power generation and reforestation efforts, all designed to protect our planet for future generations.

Fundamentals

- Democratizes access to rendering capabilities without investing in expensive hardware, while lowering cost for users compared to traditional service providers (AWS, Google Cloud, Azure).
- Leverages distributed computing to enhance rendering scalability, utilizing idle resources and overcoming physical limitations of traditional data centers.
- Render serves as a Medium of exchange to pay for rendering services, acts as a governance token, and is used to incentivize node operators to contribute their GPU services.

Risk Factors

- Faces competition in a highly competitive sector within the crypto industry that could jeopardize its market share.
- Declining hype around AI and its potential would negatively impact the demand for Render and its sentiment.
- Performance limitations in distributed computing may hinder Render's efficiency and competitiveness compared to its traditional counterparts in the web2 space during this early stage of growth.

It is not possible to invest directly in an index. Exposure to an asset class represented by an index is available through investable instruments based on that index. The Company makes no assurance that investment products based on the index will accurately track index performance or provide positive investment returns. The Company is not an investment advisor and makes no representation regarding the advisability of investing in any such investment fund or other investment vehicle. A decision to invest in any such investment fund or other investment vehicle should not be made in reliance on any of the statements set forth on this website. Prospective investors are advised to make an investment in any such fund or other vehicle only after carefully considering the risks associated with investing in such funds, as detailed in an offering memorandum or similar document that is prepared by or on behalf of the issuer of the investment fund or other investment product or vehicle. The Company is not a tax advisor. A tax advisor should be consulted to evaluate the impact and consequences of making any particular investment decision. Inclusion of any assets within an index is not a recommendation by the Company to buy, sell, or hold such security, nor is it considered to be investment advice. These materials have been prepared solely for informational purposes based upon information generally available to the public and from sources believed to be reliable. No content contained in these materials(including index data, ratings, credit-related analyses and data, research, valuations, model, software or other application or output therefrom) or any part thereof ("Content") may be modi ed, reverse-engineered, reproduced or distributed in any form or by any means, or stored in a database or retrieval system, without the prior written permission of the Company. Investments into crypto currencies and/or digital assets are subject to material and high risk including the risk of total loss. The calculated prices may not be achieved by investors as the calculated price is based on prices from different trading platforms. Furthermore, an investment into crypto currencies and/or digital assets may become illiquid depending on the trading platform or investment product used for the specific investment. Investors should carefully review all risk factors disclosed by the relevant trading platform or in the product documents of relevant investment products.

Charts and graphs are provided for illustrative purposes. Past performance is not an indication or guarantee of future results. The charts and graphs may reflect hypothetical historical performance. All information presented prior to the launch date is back-tested. Back-tested performance is not actual performance but is hypothetical. The back-test calculations are based on the same methodology that was in effect when the index(es) was officially launched. It is not possible to invest directly in any index. Prospective application of the methodology used to construct the index(es) as well as revisions to economic data may not result in performance commensurate with the back-test returns shown. The back-test period does not necessarily correspond to the entire available history of the index(es). Another limitation of using back-tested information is that the back-tested calculation is generally prepared with the benefit of hindsight.

Back-tested data and/or information reflects the application of the index methodology and selection of index constituents in hindsight. No hypothetical record can completely account for the impact of financial risk in actual trading. For example, there are numerous factors related to the equities, fixed income, or commodities markets in general which cannot be, and have not been accounted for in the preparation of the index information set forth, all of which can affect actual performance. The index returns shown do not represent the results of actual trading of investable assets.
