### Chances

- Specific engagement in strongly growing emerging countries of the Asia-Pacific region.
- Return potential from the price appreciation of individual equities as well as from positive developments on the overall market level.
- Broad risk diversification through investing in a large number of individual financial instruments and throughout different sectors and countries.
- Where applicable, returns from exchange rate fluctuations.
- Where applicable, additional returns from „stock-picking“ and active management.

### Risks

- Investments in emerging countries are considered particularly high-risk and volatile.
- The performance of the fund unit is subject to share price and market fluctuations.
- There are risks from movements in exchange rates and - where applicable - risks from the use of derivative financial instruments.
- Financial instruments are inherently associated with risks. The value of a fund unit may, given the circumstances, fall below the purchase price.

A detailed account of existing risks can be found in the chapter "Overview of Risks" of the sales prospectus and in the chapter "Risk and Return Profile" of the Key Investor Document (available in German language only), reading of which is recommended.
