The Fixed Income segment contributed negatively to performance. The non-G4 sovereign debt allocation was penalised by the widening of the 10-year spread between Italian BTPs and German Bunds, as well as the underperformance of local emerging debt against US Treasuries. The long G4 duration stance also posted losses. Conversely, arbitrages on the American yield curve benefited from the bear steepener.

FX strategies exhibited negative returns as the EM FX complex bore the brunt of a stronger US dollar. However, the intra-bloc FX allocation benefited from the strengthening the euro versus GBP, CHF, and CZK. Gains also resulted from the long directional USD stance.

The credit segment was neutral in its contribution to performance.

The Equity segment reported strong gains overall. The long US blue chips against small & mid-caps arbitrage outperformed. Sector arbitrages benefited from the retracement of Tech and Consumer Staples versus the EU Auto and Financials.

The Fund is a Fonds Commun de Placement (FCP) organized under the laws of France and authorized by the Autorité des Marchés Financiers for sale in France in accordance with the requirements set forth in its prospectus.

Past performance is not a reliable indicator of future performance.
