#### **DISTRIBUTION OF ESG SCORES**

### **DEFINITIONS OF EXTRA-FINANCIAL TERMS**

Crédit Mutuel Asset Management's proprietary ESG analysis model assesses the non-financial risks and opportunities of issuers in the portfolio through three main pillars of analysis: environmental, social, and governance. A rating is calculated based on these three components, which allows each issuer to be ranked in terms of ESG. The exercise of voting rights and dialogue or engagement with companies, particularly in the event of controversy, complete our responsible investment approach.

Environment: this pillar assesses companies' strategies for managing and reducing the environmental impact of their activities and across their entire value chain, covering in particular the company's environmental approach, climate trajectory, biodiversity policy, water and energy consumption, and waste management.

Social: this pillar analyzes human capital management strategies (covering employees as well as suppliers and subcontractors) and relations with customers and civil society. It assesses respect for human rights, health and safety policy, the resources allocated to skills development, job quality, and commercial and marketing practices.

Governance: this pillar covers both business ethics (lobbying practices, compliance with market rules on corruption, etc.) and corporate governance practices (composition and functioning of governance bodies, executive compensation, etc.).

The information contained in this document (themes, investment process, portfolio holdings, etc.) is valid on the date indicated but is subject to change. No reference to a ranking rating or award constitutes a guarantee of future results and is not constant over time.

The information contained in this document does not constitute an offer or solicitation to invest, nor does it constitute investment advice, a recommendation on specific investments or legal advice. The figures are not contractually binding and are subject to change.

Information on the fund, including performance calculations and other data, is provided by the management company at the date of the document. These performances do not take into account fees and expenses relating to the issue and redemption of units or taxes. The value of investments and the income derived from them may go down as well as up and the investor may not get back the full amount originally invested. Changes in exchange rates may also affect the value of the investment. For this reason, and given the initial charges usually levied, an investment is not generally suitable as a short-term investment. Fees and expenses have an adverse effect on the fund's performance.

Past performance is no guarantee of future performance and is not constant over time. Investing in a UCI can be risky, the investor may not get back the money invested. If you wish to invest, a financial adviser will be able to help you assess the investment solutions that match your objectives, your knowledge and experience of the financial markets, your assets and your sensitivity to risk, and will also explain the potential risks.

The tax treatment of holding acquiring or disposing of shares or units in a fund depends on the tax status or treatment specific to each investor and may be subject to change. Potential investors are strongly encouraged to seek advice from their own tax advisor.

SFDR Classification: The Sustainable Finance Disclosure Regulation aims to direct capital flows towards more responsible investments, to ensure transparency, consistency and quality of information for investors and thus to allow a comparison of the different investment vehicles. It applies to all financial market players but also to products.

3 categories of products:

1/ Automatically all funds are classified in Article 6, without sustainability objective.

2/ Article 8 applies for funds that promote ESG characteristics.

3/ Article 9 goes further, with a sustainable and measurable investment objective. That is, the funds invest in an activity that contributes to an environmental or social objective, such as reducing CO2 emissions or fighting inequality.
