

LGIM Euro Liquidity Fund

LGIM Liquidity Funds plc (UCITS compliant) 2-Class EUR Dist

Base currency: **EUR**

Domicile: **Ireland**

FUND AIM

To provide capital stability and a return in line with money market rates whilst providing daily access to liquidity and providing an income. The Fund seeks to maintain a AAA rating, which is the highest fund rating available.

FUND SNAPSHOT

- **What does it invest in?** Invests in short-term, euro based assets issued by governments, high quality banks and companies.
- **How does it invest?** Actively managed, investing in deposits, short-term money market instruments that mature within 397 days and have been awarded one of the two highest available short-term credit ratings by each recognised credit rating agency. May also invest in eligible short-term securitisations.
- **Does it promote sustainability characteristics?** The Fund promotes a range of environmental and social characteristics. Further information on how such characteristics are met by the Fund can be found in the Supplement.

WHO IS THIS FUND FOR?

- The Fund is a short-term money market fund and a low volatility net asset value money market fund as defined in Regulation (EU) 2017/1131 (the MMFR). Therefore, the Fund must comply with the requirements for such funds as outlined in the MMFR, including with regard to its permitted investments and the maturity profile of such investments.
- The Fund may be suitable for investors seeking a lower than average risk with returns slightly higher than cash. This investment is more suitable for medium to long-term investors.
- As a result of periods of low or even negative prevailing money market rates, the Fund may have a net negative yield which would impact the value of your Shares.
- If you do not understand this document we recommend you seek additional information to help you decide if this fund is right for you.

LIQUIDITY FUNDS

For the L&G Liquidity Funds the macroeconomic outlook acts as an anchor to portfolio construction. Fundamental credit research, focused on the evolution of credit quality, provides a universe of permitted issuers. While investment and operational risk management oversight ensures consistency with portfolio objectives.

LIQUIDITY MANAGEMENT

Liquidity Management (within Global Trading and Liquidity) forms a strategic part of our asset management capability incorporating liquidity and short duration portfolios as well as securities financing.

RISK AND REWARD PROFILE

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you. We have classified this product as class 1 out of 7, which is the lowest risk class. This product does not include any protection from future market performance so you could lose some or all of your investment. **Be aware of currency risk.** You may receive payments in a different currency, so the final return you will get depend on the exchange rate between the two currencies. This risk is not considered in the indicator shown above. The Fund is not covered by an investor compensation scheme. The value of the fund may be affected by risks not in the SRI: failure of a counterparty, custodian or issuer; derivative use; inability to sell holdings; trends in interest rates/inflation.

KEY RISKS

- The value of an investment and any income taken from it is not guaranteed and can go down as well as up; you may not get back the amount you originally invested.
- This fund holds bonds that are traded through agents, brokers or investment banks matching buyers and sellers. This makes the bonds less easy to buy and sell than investments traded on an exchange. In exceptional circumstances the fund may not be able to sell bonds and may defer withdrawals, or suspend dealing. The Directors can only delay paying out if it is in the interests of all investors and with the permission of the fund depositary.
- The fund invests directly or indirectly in bonds which are issued by companies or governments. If these companies or governments experience financial difficulty, they may be unable to pay back some or all of the interest, original investment or other payments that they owe. If this happens, the value of the fund may fall.
- The fund could lose money if any institution providing services such as acting as counterparty to derivatives or other instruments, becomes unwilling or unable to meet its obligations to the fund.
- Shares in the fund are not the same as deposits. The amount invested in the fund may fluctuate up or down and you bear the risk of any loss of investment. The fund is not protected by any national deposit protection scheme.
- Investment returns on bonds are sensitive to trends in interest rate movements. Such changes will affect the value of your investment.
