Risk Rating

Key Risks Related to the Fund

There is no capital guarantee or protection of the value of the Fund. The value of your investment and the income from it can go down as well as up and you may not get back the amount you originally invested.

In view of the concentrated nature of the Fund's investments, the level of risk is expected to be higher than for a broader based portfolio and the value may be more volatile.

The Fund may invest in units or shares of other investment funds. Such other funds may themselves be subject to their own fees and expenses.

Key Risks Related to the Share Class

The returns from your investment may be affected by changes in the exchange rate between the Fund's base currency, the currency of the Fund's investments, your share class and your home currency.

See "Risk Factors" in the UCITS' Prospectus and Fund Supplement for more information about risks.

Glossary

Active Share measured as a percentage, active share is the degree of deviation in holdings between a portfolio and its benchmark. Active share of a portfolio is calculated as half the sum of the absolute active weights of all securities in a portfolio and its benchmark. For portfolios without shorts, the statistic ranges from 0% (index tracker) to 100% (no overlap with index). The higher the number, the more "active" the manager is.

Alpha represents the return of a portfolio that is attributable to the manager's investment decisions.

Beta measures a fund's sensitivity to movements in the overall market.

EPS represents the fiscal period earnings per share (EPS) for the period.

Information ratio represents the value added by the manager (excess return) divided by the tracking error.

The **Ongoing Charges** represent the ongoing costs to the fund from one year to the next which includes but is not limited to the fund's annual management fees, professional fees, audit fees, custody fees and custody transaction fees. It

does not include any performance fee or portfolio transaction costs incurred buying or selling assets for the fund. The Ongoing charges may vary from year to year.

P/E Ratio/ Earnings Per Share (EPS).

Price to Book Value / Book Value per Share.

Return on Equity (ROE) calculated by taking earnings per share of the company and dividing it by the stock's book value.

The **Risk Rating** is calculated in line with PRIIPs Regulation 2014 (the "PRIIPs Regulations")

Sharpe ratio measures return in excess of the risk free rate for every unit of risk taken.

Tracking error measures the volatility of the difference between a portfolio's performance and the benchmark.

Volatility is a measure of the fund's returns in relation to its historic average.
