

# L&G Global Bond Multiverse Index Fund

ICAV (UCITS compliant) | EUR Acc

Base currency: USD

Domicile: Ireland

## FUND AIM

The investment objective of the Fund is to provide investors with a return in line with the performance of global bond markets as represented by the Index.

## WHO IS THIS FUND FOR?

- The Fund may be suitable for retail and professional investors who want to invest for at least five years and are looking for an option that aims to track global bond markets as represented by the Index and prepared to accept the risks and volatility associated with an investment of this type.
- Although investors can take their money out at any time, this fund may not be appropriate for those who plan to withdraw their money within five years.
- This fund is not designed for investors who cannot afford more than a minimal loss of their investment.
- If you do not understand this document we recommend you seek additional information to help you decide if this fund is right for you.

## FUND SNAPSHOT

- Aims to track the performance of the Bloomberg Multiverse 500MM B3+ Custom Index
- Invests in a wide range of government and corporate bonds and with exposure to developed, as well as emerging countries. The Fund may also invest into certain securitised assets
- Employs a low-cost and pragmatic sampling index replication approach

INDEX FUND  
MANAGEMENT TEAM

The skill set and expertise we have developed over 35+ years in index management has allowed us to continuously evolve our investment processes. The Index Fund Management team comprises 30 fund managers with an average experience of 15 years, supported by 33 broader team members. Management oversight is provided by Howie Li, Global Head of Index Funds. The team also has full access to the resources and research of other specialists within L&G, including economists and strategists.

Higher fund constituents vs. index constituents may be due to liquidity positions, derivatives, short term investments and fractional unit differences.

- The value of an investment and any income taken from it is not guaranteed and can go down as well as up; you may not get back the amount you originally invested.
- This fund invests in countries where investment markets are considered to be less developed. This means that investments are generally riskier than those in developed markets because they: may not be as well regulated; may be more difficult to buy and sell; may have less reliable arrangements for the safekeeping of investments; or may be more exposed to political and taxation uncertainties. The value of the fund can go up or down more often and by larger amounts than funds that invest in developed countries, especially in the short term.
- This fund holds bonds that are traded through agents, brokers or investment banks matching buyers and sellers. This makes the bonds less easy to buy and sell than investments traded on an exchange. In exceptional circumstances the fund may not be able to sell bonds and may defer withdrawals, or suspend dealing. The Directors can only delay paying out if it is in the interests of all investors and with the permission of the fund depositary.
- The fund invests directly or indirectly in bonds which are issued by companies or governments. If these companies or governments experience financial difficulty, they may be unable to pay back some or all of the interest, original investment or other payments that they owe. If this happens, the value of the fund may fall.
- Prices of the Asset-Backed Securities (ABS) and Mortgage-Backed Securities (MBS) may be volatile, and will generally fluctuate due to a variety of factors that are inherently difficult to predict. In addition, the terms of the ABS/MBS may restrict its sale in particular circumstances.
- The fund could lose money if any institution providing services such as acting as counterparty to derivatives or other instruments, becomes unwilling or unable to meet its obligations to the fund.
- Derivatives are highly sensitive to changes in the value of the asset on which they are based and can increase the size of losses and gains.
- The fund may have underlying investments that are valued in currencies that are different from the currency of this share class. Exchange rate fluctuations will impact the value of your investment. Currency hedging techniques may be applied to reduce this impact but may not entirely eliminate it.
- We may take some or all of the ongoing charges from the fund's capital rather than the fund's income. This increases the amount of income, but it reduces the growth potential and may lead to a fall in the value of the fund.
- Investment returns on bonds are sensitive to trends in interest rate movements. Such changes will affect the value of your investment.
- The Fund will not replicate the performance of its benchmark index perfectly. This is because the fund will incur drag on performance such as expenses, tax and transactions costs, which the benchmark index is not subject to.
