

L&G Global Government Bond Fund

ICAV (UCITS compliant) | USD Acc

Base currency: USD

Domicile: Ireland

FUND AIM

The investment objective of the Fund is to provide investors with a long-term return consisting of a combination of capital growth and income

WHO IS THIS FUND FOR?

- This Fund is designed for investors seeking income or growth from an investment in global government bonds denominated in the national currency of the issuer.
- Although investors can take their money out at any time, this fund may not be appropriate for those who plan to withdraw their money within five years.
- This fund is not designed for investors who cannot afford more than a minimal loss of their investment.
- If you do not understand this document we recommend you seek additional information to help you decide if this fund is right for you.

FUND SNAPSHOT

- The Fund is actively managed and seeks to achieve a long-term return consisting of a combination of capital growth and income.
- Fund invests at least 80% in investment grade bonds issued by governments, government-related entities and government agencies located around the world.

All performance periods over a year will be annualised. Performance for the I USD Acc share class in USD, launched on 26 November 2024. Source: Lipper. Performance assumes all fund charges have been taken and that all income generated by the investments, after deduction of tax, remains in the fund.

Past performance is not a guide to the future.

Fund returns shown are based on prices as at the last fund trading day for the month. Due to bank holidays this may impact relative performance to any benchmarks which are priced on a bank holiday which falls within a month but after the last fund trading day for that month.

FUND MANAGERS

Alexander
Mack

Simon
Bell

Alex is the Head of Rates and Inflation in Active Strategies. He is responsible for managing interest rate exposure in Fixed Income and Multi Asset portfolios. Alex joined LGIM in 2013. Alex holds an MPhil in Economics from the University of Cambridge, St Catharine's College and a BEconSc in Economics from Manchester University.

Simon is a fund manager within the Rates and Inflation team where he is responsible for the management of a number of portfolios. Simon joined LGIM in March 2012. Previously he was at Aberdeen Asset Management where he was a portfolio manager in both the Global Macro team and the European Product team for four years. Simon spent a total of 12 years at Aberdeen, and prior to being a fund manager, he held various other positions including being a key and founding member of the LDI team and ran the trading desk from 2001 to 2008. Simon graduated from Bournemouth University with a BA (hons) in financial services and holds the IMC.

RISK AND REWARD PROFILE

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you. We have classified this product as class 3 out of 7, which is a medium-low risk class. This product does not include any protection from future market performance so you could lose some or all of your investment. **Be aware of currency risk.** You may receive payments in a different currency, so the final return you will get depend on the exchange rate between the two currencies. This risk is not considered in the indicator shown above. The Fund is not covered by an investor compensation scheme. The value of the fund may be affected by risks not in the SRI: failure of a counterparty, custodian or issuer; derivative use; inability to sell holdings; trends in interest rates/inflation.

KEY RISKS

- The value of an investment and any income taken from it is not guaranteed and can go down as well as up; you may not get back the amount you originally invested.
- The fund invests directly or indirectly in bonds which are issued by companies or governments. If these companies or governments experience financial difficulty, they may be unable to pay back some or all of the interest, original investment or other payments that they owe. If this happens, the value of the fund may fall.
- The fund could lose money if any institution providing services such as acting as counterparty to derivatives or other instruments, becomes unwilling or unable to meet its obligations to the fund.
- Derivatives are highly sensitive to changes in the value of the asset on which they are based and can increase the size of losses and gains. The impact to the fund can be greater where derivatives are used in an extensive or complex way.
- The fund may have underlying investments that are valued in currencies that are different from the currency of this share class. Exchange rate fluctuations will impact the value of your investment. Currency hedging techniques may be applied to reduce this impact but may not entirely eliminate it.
- We may take some or all of the ongoing charges from the fund's capital rather than the fund's income. This increases the amount of income, but it reduces the growth potential and may lead to a fall in the value of the fund.
- Investment returns on bonds are sensitive to trends in interest rate movements. Such changes will affect the value of your investment.
