## Risk & Reward Indicator ("SRI") & Inherent Risks

The risk indicator is based on historical data and may not be a reliable indicator of the future risk profile of the Fund, is not guaranteed and may change over time. The lowest category does not mean risk free.

The EU PRIIP KID risk indicator for the Fund is set as 5, which reflects the historic price behaviour of the Fund.

UK investors can access the UCITS KIIDs / SRI from our website: [https://docs.publifund.com/kiid/IE000WR6LRN2/en\\_GB](https://docs.publifund.com/kiid/IE000WR6LRN2/en_GB)

The sub-fund may be subject to high volatility.

Factors that affect the indicator include: Investments in equity securities are subject to fluctuations in value dependent on market conditions which will directly affect the value of investments. The Fund invests with a concentrated country focus which will increase the risk of investing when compared to a fund that invests in a globally diversified range of countries. Additional risks: custody and settlement, financial derivatives, liquidity, operational and taxation, currency, credit, legal and regulatory risks. Further the Fund may utilise financial derivative contracts such as equity index options and single stock options both to gain and hedge exposure to market risk. Such use may increase or reduce exposure to underlying assets; therefore their use may result in greater fluctuations of the Net Asset Value of the Fund. For more information about potential risks, please refer to the Key Information Document (KID), the Prospectus and Supplement available at ericsturdza.com/literature/.

## Our Vision, Mission & Values

### Vision

Our vision and aspiration is to become a leading asset management company, with a distinctive brand and reputation for exceptional services at all levels.

We aim to align our capabilities with the needs of investors today and in the future, providing access to our best investment ideas, within a framework that seeks to achieve better environmental, societal and governance outcomes.

### Mission

Our overarching mission is to deliver long term performance and value to our clients, recognising that "value" today encapsulates more than pure economic returns. As such our aspiration as an Asset Manager is to establish products that provide varying value profiles, from those driven by economic returns, to more risk or factor orientated capabilities.

### Values

We believe managing wealth is not a business, it is a profession. We grow as the reward for a craft that we perform with integrity, expertise and passion. Accordingly, we believe that it is essential that we meet the highest ethical and professional standards in all we do.

We are mindful of the global issues that we face today and our obligation to take whatever action we can to address these. As an Asset Manager we believe we have the opportunity to actively contribute through the investment decisions we make, allocating money to those companies that are able to demonstrate strong environmental, social and governance (ESG) credentials, or those that are actively transitioning their business to ensure ESG considerations are fully integrated within their investment processes. This belief resonates through our Company and we continue on a journey to ensure that such considerations and aspirations are reflected in all our activities and relationships. We also look at the way we can directly support projects that seek to address such considerations, this takes various forms and includes amongst others; clean water, education and reforestation projects.

We recognize the value of our team, fundamentally believing that our collective success is driven primarily by the people we work with, hence our focus of identifying exceptional talent at all levels.
