RISKS

Investing in securities involves the risk of loss and there is no guarantee that all or any capital invested will be repaid. Past performance is never a guarantee of future returns. Investing in shares of the Fund does not grant an investor any ownership interests in the assets held by the Fund. Before investing in the Fund, the Fund's investment objectives, risk, charges and expenses should be carefully considered, including:

Currency Risk: The base currency of the Fund is USD. The non-USD share classes may be affected unfavourably by fluctuations in currency rates.

Liquidity Risk: Some of the Fund's investments may be difficult to buy or sell. This might affect the price at which the investments can be sold, which would affect the Fund's value.

Counterparty Risk: There is a risk that counterparties to some of the Fund's investments may not perform their obligations and that transactions may not settle.

Market Capitalisation Risk: The Fund will generally invest in small market capitalisation companies for which effective sales of securities may be more difficult and there may be greater price volatility.

As further described in the Fund's KIID, this Fund has a risk classification score of 6 due to its exposure to equity markets, which means the Fund may experience significant volatility. For a current prospectus, KIID and supplemental documents which contain the definitive information on these and other important topics, please visit <https://www.fisherinvestments.com/en-gb/ucits>. The Fund's prospectus and supplement can be obtained in English. Please refer to the Fund's prospectus, supplement and KIID before making any final investment decisions.
