GF ABSOLUTE RETURN BOND

Institutional Acc USD Class (B10) - Fund Factsheet - Covering the month of February 2022

The Fund

The Fund aims to generate a positive absolute return through a combination of capital growth and income over a rolling 12 month period, irrespective of market conditions. The Fund aims to achieve its investment objective through investment in corporate and government fixed income markets worldwide, including developed and emerging markets. In achieving its objective, the Fund also aims to minimise volatility and reduce the possibility of a significant drawdown (i.e. a period where the Fund is worth less than the initial investment at the start of a 12 month period). For full investment objective and policy details please refer to the Prospectus.

Key risks: Past performance is not a guide to future performance. Investment in the GF Absolute Return Bond Fund involves foreign currencies and may be subject to fluctuations in value due to movements in exchange rates. The value of fixed income securities will fall if the issuer is unable to repay its debt or has its credit rating reduced. Generally, the higher the perceived credit risk of the issuer, the higher the rate of interest. Bond markets may be subject to reduced liquidity. The Fund may invest in emerging markets/soft currencies and in financial derivative instruments, both of which may have the effect of increasing volatility. Discrete performance data is not available for five full 12 month periods due to the launch date of the portfolio.

^{^^}The amount of income generated for distribution after deducting all expenses.

Aim to generate an absolute return whilst also aiming to minimise the Fund's volatility and reducing the possibility of a significant drawdown (i.e. a period where the fund is worth less than the initial investment at the start of a 12 month period).
