方瀾研究與投資

FountainCap Greater China Select (UCITS)

30 May 2025

INVESTMENT OBJECTIVE

To achieve consistent long-term investment results for investors through identifying and investing in companies that will substantially benefit from China's transformation and long-term growth. The Fund is a long-only equity fund and employs a bottom-up stock picking approach that focuses on conducting thorough fundamental research.

The investment characteristics promoted by this fund include sound corporate governance and strong disclosures around sustainability/impact.

INVESTMENT OPPORTUNITY & PHILOSOPHY

The FountainCap investment strategy is built on the following principles:

- **Fundamental Research:** FountainCap believes that the complexity of China transformation can only be understood by thorough fundamental research. Via this bottom-up approach the investment team attempt to discover investment opportunities that are overlooked or under-appreciated.
- **Long-term:** FountainCap believes that short term trading provides the least value to long-term results. A long term investment horizon allows FountainCap to exploit volatility and avoid 'timing' the market.
- **Bottom-up Stock Picking:** The Chinese capital market is underdeveloped and structurally inefficient, which creates excellent opportunities for patient active managers. FountainCap's 'backpack' grassroot research helps drive the majority of portfolio returns.

RISK AND REWARD PROFILE

This indicator above is based on historical data and may not be a reliable indication of the future risk profile of the Fund. The risk category shown is not guaranteed and may change over time. The lowest category does not mean a risk-free investment.

This Fund is in risk category 6 due to the historic performance of a fund with similar investment policy.

The Fund may be subject to risks which are not included in the calculation of the risk-reward indicator.

Key risk factors:

Market Risk: A risk that the market will go down in value with the possibility that such changes will be sharp and unpredictable.

Geographical Risk: The fund may invest primarily in Greater China, which means that it may be more sensitive to local economic, market, political or regulatory events in Greater China, and may be more affected by these events than other funds that invest in a broader range of regions. The fiduciary duties of issuers and the levels of investor protection imposed by regulators is generally less comprehensive in emerging market countries than in developed markets. **Operational Risk (including safekeeping of assets):** The Fund and its assets may experience material losses as a result of technology/system failures, insolvency of service providers

cybersecurity breaches, human error, policy breaches and/or incorrect valuation of units. **Liquidity Risk:** The Fund may invest in securities which may, due to negative market conditions, become difficult to sell or may need to be sold at an unfavourable price. This may affect the overall value of the Fund. **Equities Risk:** The Fund may invest in equity securities which are subject to greater fluctuations than other assets. The Fund invests in shares of companies, and the value of these shares can be negatively affected by the changes in the company, its industry or the economy in which it operates. **Concentration Risk:** The Fund may invest in fewer companies than other funds which invest in shares usually do. Where this is the case, it means that the Fund does not spread its risk as widely as other funds and will therefore be affected more if an individual company has significant losses. **Currency Risk:** Changes in the exchange rate between the base currency and such denominated currency of a currency share class may lead to a depreciation of the value of such shares as expressed in the dominated currency. Fluctuations in the exchange rate between the currency(ies) of a fund's underlying assets and the currency of a share class may lead to currency risk for the holders of shares in the relevant class. Shareholders of hedged share classes should be aware that they may be substantially limited from benefiting if the denominated currency falls against the base currency and/or the currency/currencies in which the assets of the Fund are denominated. Attention is drawn to the risk that the value of the principal invested in the Fund may fluctuate. **For more information on risks, please see the section entitled "Risk Factors" in the Prospectus of the ICAV and Supplement for the Fund**

*The Net Asset Value is likely to have high volatility owing to its composition and the portfolio management techniques used.

The on-going charges are the fees the fund charges to investors to cover the costs of running the Fund. Additional costs, including transaction fees, will also be incurred. These costs are paid out by the Fund, which will impact on the overall return of the Fund.

DISCLAIMER

This is not a contractually binding document and is not sufficient to make an investment decision.

The decision to invest in the fund should take into account all the characteristics or objectives of the promoted fund as described in its Prospectus which can be found [here](#), free of charge. The Supplement, the Summary of Investor Rights and the KID can also be obtained by investors and potential investors, free of charge from Spyglass Capital Management LLC; www.fountaincapri.com and Aravis Capital Limited; www.araviscapital.com. The Summary of Investor Rights will be provided in English and can be accessed via www.araviscapital.com. The Prospectus for the ICAV and the Supplement for the Fund are available in English only. The KID for the Class I (USD/Accumulating) is available in English, French, Swedish, German, Spanish and Norwegian.

This information is not for use within any country or with respect to any person(s) where such use could constitute a violation of the applicable law.

The Fund may invest directly and/or indirectly in equity securities, debt securities, and currencies. There can be no assurance that the Fund will achieve its stated objectives.

As per the prospectus, the Fund is actively managed and comparison to the MSCI China All Shares Total Return is for reference purposes only. MSCI China All Shares index captures large and mid-cap representation across China A-shares, B-shares, H-shares, Red-chips, P-chips and foreign listings (e.g. ADRs). The index aims to reflect the opportunity set of China share classes listed in Hong Kong, Shanghai, Shenzhen and outside of China. It is based on the concept of the integrated MSCI China equity universe with China A-shares included. Total Return measures the performance of the small to midcap growth segment of the US equity market. It is a total return index which assumes that all cash distributions are reinvested in addition to tracking price movements. The Fund has significant active share, which is a measure of the percentage of stock holdings in a manager's portfolio that differs from the benchmark index. The Fund may experience significant volatility. There is no guarantee that investors will get back the full amount invested. The value of any investment may increase or decrease over time.
