Triodos Microfinance Fund provides private debt and equity to financial services providers that empower people and small businesses across the globe.

The fund has sustainable investment as its objective as set out in article 9 of the SFDR.

The sustainable investment objectives of Triodos Microfinance Fund are:

- to promote individual wellbeing through the advancement of financial inclusion;
- to support the transition to equitable and sustainable local economies; and
- to transform the financial system for a sustainable future.

The product may be exposed to risks. Please refer to the prospectus and the PRIIPs KID for more detail.

#### **Highlights**

- The monthly return of the fund was 1.9% (YTD: 7.6%).
- The fund's positive performance was primarily driven by interest payments and FX gains both in equity and debt, slightly offset by results on FX contracts.
- The fund disbursed EUR 0.3m and received EUR 7.8m in repayments. No new investees onboarded this month.
- We've enhanced our credit and country risk monitoring with US trade data to develop a tariff risk heat map for the fund portfolio. The impact of the trade war on the fund's investments remains minimal, as they primarily serve local markets, with stable demand for basic products, independent of financial cycles. Microfinance institutions cater to informal sectors largely unaffected by US policy changes. The fund's portfolio diversification mitigates global trade risks, with the portfolio spread across various markets. Most major emerging economies are well-positioned and resilient to shifting trade dynamics, supported by the flexibility of their central banks to manage inflation and stabilize currencies. Strong domestic demand in countries like India, Brazil, Nigeria and China continues to sustain growth. Better debt management helps countries coming out of debt distress like Sri Lanka and Ghana. Additionally, trade partnerships are shifting as emerging markets search for new partners outside the US to diversify their trade opportunities. Finally, a weaker US dollar and the assumption that the worst of tariffs is behind us may strengthen many emerging markets currencies, including the Brazilian Real, the Mexican Peso and the South African Rand. We observe some increased risk in Mexico, given its economic ties to the US.

#### **Net Return in %**

As per end of September 2022

					<b>3Y</b>	5Y	Since
	1M	3M	YTD	1 Y	avg	avg	inc.
Fund	1.85	2.89	7.61	10.00	4.01	4.44	4.42
		2017	2018	20	19	2020	2021
Fund		1.09	5.30	4.	.45	-3.86	8.24
