What is this product?

Type

Share of a sub-fund part of an umbrella fund in corporate form.

Term

This product does not have a maturity date, the competent body of the PRIIP (as identified in the offering documentation) is entitled to terminate the product. The amount you would receive in the event of such termination might be lower than the amount you invested.

Objectives

Investment objective The Fund is a feeder fund of JP Morgan Investment Funds – Global Income Conservative Fund incorporated in the Grand-Duchy of Luxembourg (the "Master Fund"). The Fund seeks to provide regular income by permanently investing at least 85% of its net assets in class X of the Master Fund.

Investment policy The Master Fund invests primarily in a conservatively constructed portfolio of income generating securities, globally, and through the use of derivatives.

The Master Fund promotes environmental and social characteristics pursuant to Article 8 of Regulation 2019/2088 ("SFDR").

The Master Fund will seek to achieve its investment objective through a multi-asset approach with a focus on risk-adjusted income and a flexible implementation at asset class and regional level. The Master Fund may vary its allocation response to market conditions, however will aim to have a higher allocation to debt securities than to other asset classes.

The Master Fund primarily invests in debt securities including Mortgage-Backed Security / Asset-Backed Security, equities and Real Estate Investment Trusts (REITs) from issuers anywhere in the world, including emerging markets.

The Master Fund may invest in below investment grade and unrated securities.

The Master Fund may invest in China A-Shares via the China-Hong Kong Stock Connect Programmes, and in convertible securities and currencies.

The Master Fund invests at least 51% of its net assets in issuers with positive environmental and/or social characteristics that follow good governance practices as measured through its Investment Manager's proprietary ESG scoring methodology and/or third party data.

The Investment Manager of the Master Fund evaluates and applies values and norms based screening to implement exclusions. To support this screening, on all issuers it relies on third party provider(s) who identify an issuer's participation in or the revenue which they derive from activities that are inconsistent with the values and norms based screens. The list of screens applied that may result in exclusions can be found on the website

of the Master Fund's Investment Manager: www.jpmorganassetmanagement.lu.

The Master Fund may invest up to 3% of its net assets in contingent convertible bonds.

The Fund may hold up to 15% of its net assets in ancillary liquid assets such as cash and cash equivalents, including time deposits and Money Market Instruments having an initial or residual maturity of less than 12 months or with an interest adapted at least annually according to the market conditions.

The Master Fund uses the 55% Bloomberg Barclays Global Aggregate Index (Total Return Gross) Hedged to EUR + 30% Bloomberg Barclays US Corporate High Yield 2% Issuer Capped Index (Total Return Gross) Hedged to EUR + 15% MSCI World Index (Total Return Net) Hedged to EUR benchmark as point of reference against which its performance is measured.

The performance of the Fund shall be close to the performance of the Master Fund less Fund fees.

Benchmark The Fund has no reference benchmark.

Redemption policy The Fund is open-ended. You may redeem shares of the Fund on any Business Day on which the Master Fund is valued and open to redemptions.

Distribution policy The Share Class makes no dividend payment. Earned income is retained and reinvested.

Derivatives policy The Master Fund may use financial instruments and derivatives for hedging purposes, for efficient portfolio management purposes and for investment purposes.

Intended retail investor

The Fund expects that a typical investor in the Sub-fund will be a medium term investor who knows and accepts the risks associated with this type of investment. It is designed to form part of a portfolio of investments.

What are the risks and what could I get in return?

Risks

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will

lose money because of movements in the markets or because we are not able to pay you.

We have classified this product as 3 out of 7, which is a medium-low risk class. This rates the potential losses from future performance at a medium-low level, and poor market conditions are unlikely to impact the capacity to pay you.

Be aware of currency risk. In some circumstances, you may receive payments in a different currency, so the final return you will get may depend on the exchange rate between the two currencies. This risk is not considered in the indicator shown above

Due to effects of unusual market conditions, other risks could be triggered, such as: counterparty risk and liquidity risk. Please refer to the prospectus for more detail.

This product does not include any protection from future market performance so you could lose some or all of your investment.

If we are not able to pay you what is owed, you could lose your entire investment.

Performance scenarios

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the product over the last 10 years. Markets could develop very differently in the future.

The stress scenario shows what you might get back in extreme market circumstances.

Unfavourable scenario: This type of scenario occurred when investing between 10/2019 and 10/2023.

Moderate scenario: This type of scenario occurred when investing between 09/2016 and 09/2020.

Favourable scenario: This type of scenario occurred when investing between 12/2016 and 12/2020.

What happens if Generali Investments Luxembourg S.A. is unable to pay out?

The assets of the fund are held in safekeeping by its depositary. In the event of the insolvency of Generali Investments Luxembourg S.A., the fund's assets in the safekeeping of the depositary will not be affected. However, in the event of the depositary's insolvency, or someone acting on its behalf, the product may suffer a financial loss. This risk is mitigated by the fact the depositary is required by law and regulation to segregate its own assets from the assets of the Fund. The depositary will also be liable to the Fund and the investors for any loss arising from, among other things, its negligence, fraud or intentional failure to properly fulfil its obligations. There is no compensation or guarantee scheme protecting you from a default of the fund's Management Company or depositary.

What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

Costs over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- in the first year you would get back the amount that you invested (0% annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario,
- EUR 10 000 is invested.

Example Investment 10 000 EUR		
Scenarios	If you exit after 1 Year	If you exit after 4 years (recommended holding period)
Total Costs	637 EUR	1 089 EUR
Annual Cost impact (*)	6.4%	2.6% each year

(*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 2.6 % before costs and 0.0 % after costs.
