#### **FUND SNAPSHOT**

Domicile: Luxembourg

- What does it invest in? Invests predominantly in fixed income securities with medium term maturity including bonds and other debt instruments, issued in a variety of currencies by companies and governments in emerging countries.
- How does it invest? Actively managed, investing in debt which is a mixture of investment grade (lower risk) and subinvestment grade (higher risk). May also invest in unrated bonds, other types of securities and derivatives.
- Does it promote sustainability characteristics? The Fund promotes a range of environmental and social characteristics. Further information on how such characteristics are met by the Fund can be found in the Supplement.

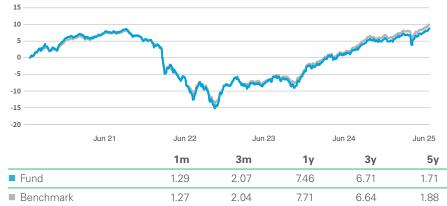

#### **BENCHMARK**

#### Benchmark

Blended benchmark consisting of 50% JP Morgan EMBIG Div 3-5 year Total Return Index and 50% JP Morgan CEMBI BD 3-5 year Total Return Index\*

\*As this is a hedged share class, the benchmark performance shown is EUR hedged in order to meaningfully reflect the performance of the share class relative to the fund's benchmark.

#### PERFORMANCE (%)

#### 12 MONTH PERFORMANCE TO MOST RECENT QUARTER (%)

12 months to 30 June	2025	2024	2023	2022	2021
Fund	7.46	8.49	4.23	-16.80	7.66
Benchmark	7.71	8.93	3.37	-15.68	7.35

All performance periods over a year will be annualised. Performance for the P EUR (Hedged) Acc share class in EUR, launched on 04 June 2018. Source: Lipper. Performance assumes all fund charges have been taken and that all income generated by the investments, after deduction of tax, remains in the fund. This fund has adopted a "swing pricing" methodology, such that the Net Asset Value per Share of the fund may be adjusted upwards or downwards to reflect the costs of dealing in the fund's assets. As the swinging price only affects shareholders which place subscription or redemption instructions, we have used the notional unswung mid-price history in the tables and charts above in order to remove the volatile effect that the swing pricing has on the depiction of past performance of the Fund.

#### Past performance is not a guide to the future.

Fund returns shown are based on prices as at the last fund trading day for the month. Due to bank holidays this may impact relative performance to any benchmarks which are priced on a bank holiday which falls within a month but after the last fund trading day for that month.

SICAV (UCITS compliant) P EUR (Hedged) Acc

#### PORTFOLIO BREAKDOWN

All data source LGIM unless otherwise stated. Totals may not sum due to rounding. As at 29 December 2022 LGIM has changed strategic data sourcing for LGIM Client Reporting and Factsheets for Active Fixed Income portfolios. This impacts the methodology used to calculate the management information provided in the documentation and may change the observed results. For the avoidance of doubt, these changes have not impacted the investment management of any funds/portfolios.

#### **RISK AND REWARD PROFILE**

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you. We have classified this product as class 2 out of 7, which is a low risk class. This product does not include any protection from future market performance so you could lose some or all of your investment. **Be aware of currency risk.** You may receive payments in a different currency, so the final return you will get depend on the exchange rate between the two currencies. This risk is not considered in the indicator shown above. The Fund is not covered by an investor compensation scheme. The value of the fund may be affected by risks not in the SRI: failure of a counterparty, custodian or issuer; derivative use; inability to sell holdings; trends in interest rates/inflation.

#### **KEY RISKS**

- The value of an investment is not guaranteed and can go down as well as up; you
  may not get back the amount you originally invested.
- This fund invests in countries where investment markets are considered to be less developed. This means that investments are generally riskier than those in developed markets because they: may not be as well regulated; may be more difficult to buy and sell; may have less reliable arrangements for the safekeeping of investments; or may be more exposed to political and taxation uncertainties. The value of the fund can go up or down more often and by larger amounts than funds that invest in developed countries, especially in the short term.
- This fund holds bonds that are traded through agents, brokers or investment banks
  matching buyers and sellers. This makes the bonds less easy to buy and sell than
  investments traded on an exchange. In exceptional circumstances the fund may
  not be able to sell bonds and may defer withdrawals, or suspend dealing. The
  Directors can only delay paying out if it is in the interests of all investors and with
  the permission of the fund depositary.
- The fund invests directly or indirectly in bonds which are issued by companies or governments. If these companies or governments experience financial difficulty, they may be unable to pay back some or all of the interest, original investment or other payments that they owe. If this happens, the value of the fund may fall.
- Prices of the Asset-Backed Securities (ABS) and Mortgage-Backed Securities (MBS) may be volatile, and will generally fluctuate due to a variety of factors that are inherently difficult to predict. In addition, the terms of the ABS/MBS may restrict its sale in particular circumstances.
- The fund could lose money if any institution providing services such as acting as counterparty to derivatives or other instruments, becomes unwilling or unable to meet its obligations to the fund.
- Derivatives are highly sensitive to changes in the value of the asset on which they are based and can increase the size of losses and gains. The impact to the fund can be greater where derivatives are used in an extensive or complex way.
- The fund may have underlying investments that are valued in currencies that are different from the currency of this share class. Exchange rate fluctuations will impact the value of your investment. Currency hedging techniques may be applied to reduce this impact but may not entirely eliminate it.
- We may take some or all of the ongoing charges from the fund's capital rather than
  the fund's income. This increases the amount of income, but it reduces the growth
  potential and may lead to a fall in the value of the fund.
- Investment returns on bonds are sensitive to trends in interest rate movements.
   Such changes will affect the value of your investment.
- The Fund has a sustainability and/or ESG focus in its investment process which
  may i) limit the Fund's exposure to or exclude certain companies, industries or
  sectors ii) impact the Fund's investment performance compared to other funds that
  do not apply such criteria and, iii) differ from an investor's own sustainability and/or
  ESG criteria.
