

Investment Objective

The World Stars Global Equity Fund seeks to achieve its objective by investing in a concentrated selection of shares in leading global companies with enduring competitive advantages and a long runway of growth.

We select companies based on our own fundamental research, taking a long-term horizon. We do not follow benchmarks and always seek to invest in quality and value.

Quality means companies that are global leaders, have strong competitive positions and pricing power in structurally attractive and growing markets, have management teams with strong records of value creation and have robust balance sheets.

Value means buying those companies at prices that allow for the prospect of significant capital growth over 5-10 years or more.

Performance since launch on 8th April 2019 is that of the Fund's A1 USD Share class. Prior to launch performance was that of J. Stern & Co.'s World Stars USD Strategy, a model or hypothetical portfolio, unhedged, which the Fund follows, based on total return (with dividends reinvested) and net of 1% fees per annum, deducted quarterly in arrears. Inception is 1st October 2012. Past performance is not a reliable indicator of future results; the value of any investment can fall as well as rise; and returns may increase or decrease as a result of currency fluctuations. The MSCI World Net Total Return Index reflects large and mid-cap issuers across 23 developed markets countries and is the benchmark for the Fund. The total return index includes price performance and income after tax from regular cash distributions. Source: Factset, Wize, Bloomberg, J. Stern & Co. As at 31st May 2025.

Portfolio Comment

Our World Stars Global Equity fund fully participated in a rally in equity markets in May. Performance was driven by our digital stocks, accounting for five of the top ten performers, with four in industrials.

The equity market was driven primarily by changes in tariff policies by the US government. These encouraged a view that the point of 'maximum tariff pain' had passed and that there would be an easing of global tensions on trade. Significant uncertainties remain but, despite that, recent data points such as strong consumer confidence in May are evidence of the underlying resilience of the US economy.

All 30 of our companies have reported their Q1 results. Following these results, consensus earnings estimates for CY2026 are unchanged for seven companies, have declined for 12 and are higher for 11. On a weighted average basis, the change across the portfolio is effectively zero, assisted by the weak USD, but benefiting also from the powerful competitive position and secular growth drivers of our companies.

Our two top performers both rose by 24% in USD. *Walt Disney* raised its full year EPS guidance by 8% following strong results. For *Nvidia*, powerful demand for its high-spec chips and AI infrastructure is effectively offsetting the loss of substantial revenue on H20 chips to China during this year. This growth is broad-based with rising demand from large corporates, sovereigns, now including HUMAIN in Saudi Arabia, and AI supercomputing clusters in many countries.
