## KEY RISKS

**Emerging Market Risk:** Risks associated with investing in emerging markets. Due to their political instability, the volatility of the exchange rate of their currencies, and the limited number of investment opportunities, the risk of these markets is greater than in countries considered as developed.

**Credit Risk:** Risks associated with issuers of debt securities, even those with a very high rating, may not be able to make payments to investors, or the fear associated with this risk may result in a decrease in the value of their debt securities.

**Management Risk:** Risks that portfolio management techniques that have generated good results under normal market conditions may prove ineffective or detrimental under abnormal conditions.
