

# Allianz Climate Transition Credit - AT - EUR

Fund for euro bonds with positive environmental and/or social characteristics

Morningstar Rating™<sup>1</sup>

Ratings as of 05/31/2025

## Investment Objective

The Fund invests in euro debt securities with positive environmental and/or social characteristics that have a very high credit rating (investment grade) and are traded on the OECD or EU bond markets. A maximum of 10% of the Fund assets may be invested in emerging-market bonds and high-yield bonds. For more information on the investment strategy, the permissible asset classes and the sustainability approach, please refer to the sales prospectus. The investment objective is to generate capital growth over the long term.

## Fund Manager

Julien Bras  
(since 12/14/2021)

Laetitia Talavera-Dausse  
(since 12/01/2024)

Solène Giraud  
(since 12/01/2024)

ALAIN Parent  
(since 04/09/2025)

Average rating	A-
Average nominal return (%)	2.58

## Opportunities

- + Current interest on bonds, price opportunities in the event of interest rate decreases
- + Increased yield potential due to the inclusion of emerging-market bonds and high-interest bonds
- + The Fund management takes sustainability aspects into account. Further information on the sustainability approach can be found in the sales prospectus.
- + Broad spread across numerous individual securities
- + Possible additional returns through individual stock analysis and active management

## Risks

- Interest rate fluctuates, price losses on bonds as interest rates rise
- Increased risk of price fluctuations, market illiquidity and losses on emerging-market and high-yield bonds
- The sustainability approach limits the investment universe.
- Limited participation in the potential of individual securities
- Success of individual stock analysis and active management not guaranteed

- 1) © 2007 Morningstar, Inc., all rights reserved. The information given here: (1) is protected by copyright for Morningstar and/or its content providers; (2) may not be reproduced or distributed; and (3) is not guaranteed to be accurate, complete or up-to-date. Morningstar and its content providers assume no responsibility for any losses or damage that result from any use of the information provided. Past performance is not a guarantee of future results. To determine the Morningstar Rating, funds of a comparable group in issue for at least three years are considered. The long-term performance serves as a basis, taking into account fees and risk. As a result, the funds are awarded stars, which are calculated monthly: Top 10%: 5 stars; next 22.5%: 4 stars; middle 35%: 3 stars; next 22.5%: 2 stars; flop 10%: 1 star. A ranking, rating or award is not an indicator of future performance and is subject to change over time.
- 2) Calculated at the net asset value, excl. front-end load, distributions reinvested. Calculation according to method as defined by BVI, the German Fund Companies Association. **The applicable front-end load is deducted from the capital invested and the indicated performance, otherwise performance is calculated net of annual fees. Regarding abbreviations in the table heading; p.a. means Per Annum, s.inc means Since Inception.**
- 3) Benchmark history: until 27/03/2025 1/3 Bloomberg MSCI Global Corporate Sustainability Total Return (hedged into EUR)+ 1/3 Bloomberg MSCI Global Green Bond Total Return (hedged into EUR)+1/3 JP Morgan ESG Emerging Markets Bond (EMBI) Global Diversified Total Return (hedged into EUR)
- 4) Calculation basis: net asset value per unit (front-end loads included in the first investment year), distributions reinvested. Calculation according to BVI method. The performance in this model calculation is based on an investment of EUR 1,000 and is adjusted for the following expenses: front-end load of 3.00% (the investment amount is reduced by EUR 29.13 on the investment date) in the first investment year. There may be annual deposit fees for the administration of the securities account, reducing the performance. Past performance is not a reliable indicator of future results.
- 5) This fund has been classified as an Article 8 under SFDR: EU Sustainable Finance Disclosure Regulation. Information accurate at time of publishing. Investors should take into account all the characteristics and/or objectives of the fund as described in its prospectus and Key Investor Document (regulatory.allianzgi.com).
- 6) The Sharpe ratio states the relationship between the return generated by the fund and the investment risk. The fund's excess return versus the risk-free market rate is compared to volatility. Negative values are not meaningful.
- 7) Volatility measures the fluctuation range of the fund's performance over a specified period of time.
- 8) This is for guidance only and not indicative of future allocation.
- 9) Securities mentioned in this document are for illustrative purposes only and do not constitute a recommendation or solicitation to buy or sell any particular security. These securities will not necessarily be comprised in the portfolio by the time this document is disclosed or at any other subsequent date.
- 10) Breakdown based on best available rating for each security. Data published by index provider may differ due to different calculation methodologies.
- 11) If the acquisition of Fund units is subject to a sales charge, up to 100% of such sales charge may be collected by the distributor; the exact amount shall be mentioned by the distributor as part of the investment advisory process. This also applies to any payment by the Management Company of an ongoing distribution fee from the all-in fee to the distributor. The all-in fee includes the expenses previously called management, administration and distribution fees.
- 12) TER generally: Total cost (except transaction costs) charged to the fund during the last financial year. TER for funds-of-funds: The costs incurred by the fund itself (except transaction costs). Since the fund held other investment units ("target funds") in the reporting period, further costs, charges and fees may have been incurred at the level of the target fund.
- 13) Represents the lowest potential yield that an investor could theoretically receive on the bond up to maturity if bought at the current price (excluding the default case of the issuer). The yield to worst is determined by making worst-case scenario assumptions, calculating the returns that would be received if worst-case scenario provisions, including prepayment, call or sinking fund, are used by the issuer (excluding the default case). It is assumed that the bonds are held until maturity and interest income is reinvested on the same conditions. Calculation is before currency hedging. The yield to worst is a portfolio characteristic; in particular, it does not reflect the actual fund income. The expenses charged to the fund are not taken into account. As a result, the yield to worst is not suitable as an indicator of the future performance of a bond fund. Forecasts are not a reliable indicator of future results.
- 14) The yield to maturity of a bond indicates what capital growth p.a. is theoretically possible up to maturity, if bought at the current price. In addition to coupon income, any price gains/losses up to repayment of the bond are taken into account. The yield to maturity of a fund is the weighted average of the yield to maturity of all the bonds that are held. It is assumed that the bonds are held until maturity and interest income is reinvested on the same conditions. The yield to maturity is a portfolio characteristic; in particular, it does not reflect the actual fund income. The expenses charged to the fund are not taken into account. As a result, the yield to maturity is not suitable as an indicator of the future performance of a bond fund.

## Disclaimer

Investing involves risk. The value of an investment and the income from it may fall as well as rise and investors might not get back the full amount invested. Investing in fixed income instruments may expose investors to various risks, including but not limited to creditworthiness, interest rate, liquidity and restricted flexibility risks. Changes to the economic environment and market conditions may affect these risks, resulting in an adverse effect to the value of the investment. During periods of rising nominal interest rates, the values of fixed income instruments (including positions with respect to short-term fixed income instruments) are generally expected to decline. Conversely, during periods of declining interest rates, the values of these instruments are generally expected to rise. Liquidity risk may possibly delay or prevent account withdrawals or redemptions. Allianz Climate Transition Credit is a sub-fund of Allianz Global Investors Fund SICAV, an open-ended investment company with variable share capital organised under the laws of Luxembourg. The value of the units/shares which belong to the Unit/Share Classes of the Sub-Fund that are not denominated in the base currency may be subject to an increased volatility. The volatility of other Unit/Share Classes may be different and possibly higher. Past performance does not predict future returns. If the currency in which the past performance is displayed differs from the currency of the country in which the investor resides, then the investor should be aware that due to the exchange rate fluctuations the performance shown may be higher or lower if converted into the investor's local currency. This is for information only and not to be construed as a solicitation or an invitation to make an offer, to conclude a contract, or to buy or sell any securities. The products or securities described herein may not be available for sale in all jurisdictions or to certain categories of investors. This is for distribution only as permitted by applicable law and in particular not available to residents and/or nationals of the USA. The investment opportunities described herein do not take into account the specific investment objectives, financial situation, knowledge, experience or specific needs of any particular person and are not guaranteed. The Management Company may decide to terminate the arrangements made for the marketing of its collective investment undertakings in accordance with applicable de-notification regulation. The views and opinions expressed herein, which are subject to change without notice, are those of the issuer companies at the time of publication.
