### Investment strategy

**A responsible and opportunistic selection of Investment Grade bonds based on a proprietary ESG analysis**

Sycomore Environmental Euro IG Corporate Bonds aims to outperform the Barclays Capital Euro Corporate ex-Financials Bond TR index over a recommended minimum investment period of 3 years by investing in bonds issued by companies whose business model, products, services or production processes make a positive contribution to the challenges of energy and ecological transition through a thematic SRI strategy.

### Fund commentary

The temporary stabilisation of the trade war allowed markets to continue their rebound. However, concerns over the magnitude of the US fiscal deficit are putting pressure on the country's long-term rates. Yields on 5-year German bonds rose by a dozen basis points. The spreads with France and particularly Italy are tightening, as Moody's affirmed the country's Baa3 rating and changed the outlook to 'positive'. The Crossover index has moved closer to 300 bp - its pre-trade war levels. After almost closing down in April, the primary market proved dynamic in May and was met with high investor demand. In order to protect its long-term credit rating, the cables specialist Prysmian issued its first hybrid bond bearing a coupon of 5.25% - a particularly attractive yield considering its BB rating and initial 5-year maturity. Eaton, North America's leading electric equipment manufacturer, issued a 10-year bond bearing a coupon of 3.70% and rated A-/A3.

### Fossil fuel exposure

Share of revenues from activities linked to fossil fuels from upstream to energy production, supplied by S&P Global.

## Sustainable development goals exposure

This chart represents the main exposures to the United Nations Sustainable Development Goals and their 169 targets. Exposure is defined as the opportunity, for each company, to contribute positively to reaching SDGs, providing their products and services. This exercise doesn't aim to measure the companies effective contribution to SDGs, which is computed through our societal contribution (CS) and net environmental contribution (NEC) metrics. For each invested company, activities are analysed in order to identify those which are exposed to SDGs. For a same activity, its number of targets can vary between 0 and 2. The company target exposure to one of its activities is weighted by the revenue share gained from this activity. For more details, our annual SRI report is available in our ESG documentation.

**No significant exposure : 10%**
