Fund overview

Objective: To maximise the long term total return, while earning income and increasing the value of the Shareholder's investment over time (5 years or more)

Investment Policy: The Fund invests in a wide range of bonds issued by corporations and governments in emerging market countries. Specifically, the Fund invests in bonds of governmental, quasigovernmental, supranational, bank or corporate issuers that have their registered office, or do most of their business, in emerging market countries. The Sub-Fund may also invest up to 5% of its net assets in US Treasury notes.

Please note that this is a hedged share class, and due to interest rate differential and costs associated with performing the hedging activity, this share class will have a different outcome to the equivalent share class in the base currency.. The Benchmark changed on 1/10/2022 from 50% JPM EMBI Global Diversified Index and 50% JPM CEMBI Broad Diversified Index EUR to 50% JESG EMBI Global Diversified Index and 50% JESG CEMBI Broad Diversified Index EUR. For further information on Sustainability Risk please refer to the Sustainable Finance Disclosure section.

SFDR Classification

Article 8

Risk measurement (As at 30th Jun 2025)

The indicator is based on historical data and may not be a reliable indication of the future risk profile. The category shown may change over time. The lowest category does not mean 'risk free'

Performance

	Cumulative (%)					Annualised (%)		
	1M	3M	6M	YTD	1Y	3Y	5Y	Since inception
Fund	1.55	1.97	4.45	4.45	5.90	5.33	-	1.05
Benchmark	1.68	2.01	4.31	4.31	7.74	6.54	-	1.18

Past performance is not a guide to future performance.

Performance basis: Mid to mid, in the share class reference currency, gross of tax payable by the Fund with income reinvested. Net figures are net of ongoing charges and fees. Net and Gross performance does not include the effect of any exit or entry charge. The Fund's performance is compared against 50% JESG EMBI Global Diversified Index and 50% JESG CEMBI Broad Diversified Index

Sustainable Finance Disclosure

This Fund promotes environmental and social characteristics however does not have a sustainable investment objective. To be eligible for investment, sovereign issuers must meet the minimum standard of the Investment Managers' ESG sovereign assessment. Furthermore, all investments that are selected as part of the Investment Manager's ESG analysis must follow good governance practices and not be excluded by the ESG Baseline Exclusions as found in the ESG Baseline Exclusions Policy section. It may however not be possible to perform ESG analysis on cash, derivatives and other third-party collective investment schemes. The Investment Manager actively engages with companies and uses voting rights with the aim of positively influencing company behaviour and helping to create competitive returns. The Investment Manager integrates qualitative and quantitative data on adverse sustainability impacts into its investment processes. Whilst the sub-Fund may invest in underlying investments that contribute to climate change mitigation and/or climate change adaptation, the Sub-Fund does not make any minimum commitment to invest in one or more environmentally sustainable investments.

Further information regarding how the Investment Manager integrates ESG into its investment approach and how it engages with companies is available in the Responsible Investment Philosophy section and on the website www.avivainvestors.com.

Fund risks

Investment risk & Currency risk

The value of an investment and any income from it can go down as well as up and can fluctuate in response to changes in currency and exchange rates. Investors may not get back the original amount invested.

Emerging markets risk

Investments can be made in emerging markets. These markets may be volatile and carry higher risk than developed markets.

Credit and interest rate risk

Bond values are affected by changes in interest rates and the bond issuer's creditworthiness. Bonds that offer the potential for a higher income typically have a greater risk of default.

Derivatives Risk

Investments can be made in derivatives, which can be complex and highly volatile. Derivatives may not perform as expected, meaning significant losses may be incurred.

Illiquid Securities Risk

Some investments could be hard to value or to sell at a desired time, or at a price considered to be fair (especially in large quantities). As a result their prices can be volatile.

Sustainability Risk

The level of sustainability risk may fluctuate depending on which investment opportunities the Investment Manager identifies. This means that the fund is exposed to Sustainability Risk which may impact the value of investments over the long term.

Full information on risks applicable to the Fund are in the Prospectus and the Key Investor Information Document (KIID).

Glossary

Annualised performance

An annualised total return is the geometric average amount of money earned by an investment each year over a given time period.

Entry fee

A one-off charge may be taken from your money before it is invested. The charge is usually a percentage of the amount invested and is additional to the price paid for the units/shares. The entry charge is deducted from the investment before units/shares are bought and is also known as the "initial charge".

Exit charge

A one-off charge levied on redemption of units/shares before the proceeds of your investment are paid out. This is also known as a "redemption charge".

Ongoing charge

The ongoing charge figure represents the costs you can expect to pay annually based on last year's expenses. The ongoing charges figure is made up of various elements such as the fund management fee, professional fees, audit fees and custody fees. Performance fees (if payable) are not included in this figure.

Performance fee

The percentage of any outperformance of the hurdle rate and/or benchmark that will be taken as a performance fee.

NAV

NAV is typically an End Of Day valuation using close of market prices to value the individual securities with the portfolio or fund, rolling up to a total portfolio or fund level.

Underlying yield

This reflects the annualised income net of expenses of the fund as a percentage of the share price of the fund on the date shown. It does not include the deduction of entry charges and is the gross return before tax on distributions.

Time to Maturity

This shows the time remaining to maturity of the bonds held by the fund. Generally, the longer the duration of a holding is, the greater the price's sensitivity to any changes in interest rates.

Credit Rating

Independent ratings agencies assign different ratings to bonds depending on the bond issuers' financial strength and their outlook as well as their ability to pay interest on time and meet all of their liabilities. We use appropriate industry recognised ratings as detailed in source notes.

Modified duration

A calculation that expresses the measurable change in the value of a security in response to a change in interest rates.

Spread Duration

The Spread Duration measures the sensitivity of a security's price to changes in its Option Adjusted Spread (OAS) relative to the Treasury Curve.

Management Fee

The management fee is fixed rate charge to cover the costs of managing the investments of the fund. It accrues daily based on a percentage of the fund's net asset value and deducted from the fund's assets.

Important information**THIS IS A MARKETING COMMUNICATION**

The source for all performance, portfolio and fund breakdown data is Morningstar unless indicated otherwise.

All data is as at the date of the Factsheet, unless indicated otherwise.

For share classes that have not yet completed 5 years, the cumulative performance chart will start from the first full month.
