0.01%

Fund Overview

Fund Aspects:

The Fund is actively managed, applying short-term price, long-term price and non-price economic trend-following signals to alternative assets.

The Fund invests in a diversified portfolio of alternative assets across six categories: credit indices (including emerging, high yield and investment grade), developed and emerging interest rate swaps, emerging currencies crossed with developed base pairs, alternative commodities (including agricultural products, metals, power, emissions and other energies), volatility futures, and proprietary long-short equity factor portfolios (including valuation, momentum, stability, earnings quality, investor sentiment, and management signaling).

The Fund invests both long and short, aiming to provide exposure and performance that is lowly correlated to traditional asset classes.

Fund Objective:

The Fund seeks to produce attractive risk-adjusted returns while maintaining low-to-zero long-term average correlation to traditional markets through a trend-following strategy applied to alternative assets.

There can be no assurance that the Fund will achieve its investment objective.

Umbrella Fund:

The Fund is a sub-fund of AQR UCITS Funds, a Luxembourg based UCITS of which the management company is FundRock Management Company S.A.

Risk Management:

Risk control is built into AQR's investment process with risk management applied at every step of the portfolio's construction.

Separate Portfolio and Risk management teams actively monitor and assess risk of the Fund.

Separate risk management oversight incorporates a systematic risk-reduction process to better manage risk during periods of significant loss.

Risk and Reward Profile:

Calculated using historical data which may not be a reliable indicator of the Fund's future risk profile. See Key Investor Information Document (KIID) for details.

Share Class Performance (Net) as of 30 Sep. 2025⁵

	Share Class	Index ⁶
1 Month	6.5%	0.3%
3 Months	5.7%	1.1%
YTD	14.7%	3.2%
1 Year	18.2%	4.4%
Since Inception	15.8%	4.9%

Past performance results in complete 12-month periods (1 October – 30 September)

¹ Holdings subject to change without notice.

² Fees follow a step-down structure. Fees are charged on an investor's net aggregate subscription (subscription minus redemptions) vs. a blended weighted average approach.

³ Please note performance fees are charged over a cash hurdle measured by the ICE BofAML US 3-M T-Bill Index for this share class.

⁴ Local Lux Tax per annum of Fund's NAV, payable quarterly.

⁵ Source: AQR, Bloomberg. Past performance does not predict future returns. Returns over one year are annualised. For fees, refer to the Key Information section.

⁶ The Fund is actively managed. The Index is not being used in reference to the management and/or implementation of the investment policy of the Fund, the referenced Index is used for the calculation of performance fees and/or as a point of comparison only.

Approved as a Financial Promotion for non-MiFID II regulated activities and for Institutional Investors only.

Fund Characteristics

Risk Allocation:

Source: AQR. For illustrative purpose only. There is no guarantee that the target risk allocations will be achieved and actual allocations may be significantly different than that shown here. The illustrative allocation above does not represent the actual allocation of any AQR client account, fund or strategy. Please read important disclosures at the end of this document.

Principal Risks

- The Fund may use derivatives for investment purposes. It may be that the use of derivatives may not always be successful and cause share prices to fluctuate which may in turn result in loss to the Fund.
- The Fund is exposed to the currency markets which may be highly volatile. Large price swings can occur in such markets within very short periods and may result in your investment suffering a loss.
- The Fund may enter into one or more derivatives with a counterparty. There is a risk that this party may fail to make its payments or become insolvent which may result in the fund and your investment suffering a loss.
- The Fund may be exposed to liquidity risk where, due to a lack of marketability, the Fund's investments cannot be bought or sold quickly enough to prevent or minimise a loss.
- More information in relation to risks in general may be found in the "Risk Factors" section of the prospectus.
- The decision to invest in the Fund should take into account all the characteristics or objectives of the Fund as described in its prospectus.

Investment Approach

The Fund implements an active trend-following strategy, that is a strategy which buys assets that are rising or are expected to rise in price and sells assets that are declining or expected to decline, and benefits when those market conditions continue, in a diversified set of alternative assets that are generally harder to access than those used by traditional trend-following strategies. The Fund implements both price-based trend-following signals (short-term and long-term) and economic trend-following signals, which are based on trends in fundamental data.

The Fund seeks to achieve a gross Sharpe Ratio of 0.7 to 0.9 over a complete market cycle with low correlation to traditional assets class returns and targets a long-term strategic annual volatility of approximately 12%. At certain times, the Fund can take on significant directional views, long or short, during large and extended market trends. This means the strategy can be a source of strong positive returns during large Global 60/40 Stock/Bond portfolio drawdowns. The Fund is also expected to exhibit a moderate but diversifying correlation to traditional trend-following strategies.

The Fund invests in a portfolio of futures, swaps and forwards contracts and futures-related instruments, utilizing more than 400 markets across seven differentiated asset categories:

Equity Factors: 300+ proprietary market-neutral factor portfolios including more than 2,000 stocks.

Interest Rate Swaps: Developed and emerging interest rate swaps.

Yield Curve: Yield curve slope and butterfly strategies across developed markets.

Emerging Currencies: Emerging currencies traded across several developed base pairs.

Alternative Commodities: Harder-to-access, non-index commodities.

Credit: Developed and emerging credit default swap indices.

Volatility: Volatility futures.

Trading Strategies

The Fund implements long or short positions based on a combination of several trading strategies described below. These trading strategies take advantage of behavioral biases and actions of non-profit-seeking market participants, such as central banks. They specifically take advantage of under-reaction, which allows the Fund to enter a long or short position before news and information is fully reflected in asset prices. Additionally, the trading strategies can also benefit from over-reaction, as several behavioral biases, such as herding, can cause asset prices to overshoot their fundamental value. The Fund pursues trends in both traditional and alternative markets.

Price Trends

Price trends use an asset's own price history to take a long or short position depending on trailing performance over both short-term and long-term horizons. These signals take advantage of market participants' behavioral biases and tactically enter and exit positions with varying conviction levels depending on the magnitude of price-moves in each horizon, as well as alignment across the different trend horizons.

Economic Trends

Economic trends also take advantage of behavioral biases, but follow trends in economic data. As markets have a tendency to underact to news, signals based on relevant data can offer an innovative approach to identifying price trends in markets. These signals formulate views based on key economic themes such as growth, inflation, monetary policy, international trade and sentiment.

At the nexus of economics, behavioral finance, data and technology, AQR's evolution over two decades has been a continuous exploration of what drives markets and how it can be applied to client portfolios. The firm is headquartered in Greenwich, Connecticut, with offices in Bangalore, Dubai, Hong Kong, London, Munich and Sydney.

Assets Under Management⁷

Total Assets: \$166.1bn

⁷ Approximate as of 30 Sep. 2025. Includes assets managed by AQR and its advisory affiliates.

Disclosures

This is a marketing communication. Please refer to the Prospectus, KIID and (where applicable) KID for more information on general terms, risks and fees. Investors should only invest in the Fund once they have reviewed the Prospectus, KIID and (where applicable) KID, the most recent versions are available free of charge, in English and in your local language at AQR UCITS Funds, c/o HedgeServ (Luxembourg) 4th Floor, K2 Forte, 2-2a Rue Albert Borschette, L-1246, Luxembourg, along with the annual and semi-annual report and articles (each in English). Investors may wish to consult an independent financial advisor for personal and specific investment advice before investing. Only the information provided in the Prospectus and the KIID is legally binding. Not all share classes are available for investment in all countries. The Prospectus as well as a summary of investor rights are available in English. The relevant KIID is available in Danish, Dutch, English, French, German, Icelandic, Italian, Norwegian, Spanish, Swedish, and depending upon the specific fund, Greek and Portuguese. These documents are available at: <https://ucits.aqr.com/>.

The information set forth herein has been obtained or derived from sources believed by AQR Capital Management, LLC ("AQR") to be reliable. However, AQR does not make any representation or warranty, express or implied, as to the information's accuracy or completeness, nor does AQR recommend that the attached information serve as the basis of any investment decision. This document has been provided to you solely for information purposes and does not constitute an offer or solicitation of an offer, or any advice or recommendation, to purchase any securities or other financial instruments, and may not be construed as such. This document is intended exclusively for the use of the person to whom it has been delivered by AQR and it is not to be reproduced or redistributed to any other person.

This document is not research and should not be treated as research. This document does not represent valuation judgments with respect to any financial instrument, issuer, security or sector that may be described or referenced herein and does not represent a formal or official view of AQR.

The views expressed reflect the current views as of the date hereof and AQR does not undertake to advise you of any changes in the views expressed herein. It should not be assumed that AQR will make investment recommendations in the future that are consistent with the views expressed herein, or use any or all of the techniques or methods of analysis described herein in managing client accounts. AQR and its affiliates may have positions (long or short) or engage in securities transactions that are not consistent with the information and views expressed in this document.

The information contained herein is only as current as of the date indicated, and may be superseded by subsequent market events or for other reasons. Charts and graphs provided herein are for illustrative purposes only. The information in this document has been developed internally and/or obtained from sources believed to be reliable; however AQR does not guarantee the accuracy, adequacy or completeness of such information. Nothing contained herein constitutes investment, legal, tax or other advice nor is it to be relied on in making an investment or other decision.

There can be no assurance that an investment strategy will be successful. This document should not be viewed as a current or past recommendation or a solicitation of an offer to buy or sell any securities or to adopt any investment strategy.

The investment strategy and themes discussed herein may be unsuitable for investors depending on their specific investment objectives and financial situation. Please note that changes in the rate of exchange of a currency may affect the value, price or income of an investment adversely.

No representation or warranty, express or implied, is made or given by or on behalf of AQR or any other person as to the accuracy and completeness or fairness of the information contained in this document, and no responsibility or liability is accepted for any such information.

There is no guarantee, express or implied, that long-term return and/or volatility targets will be achieved. Realized returns and/or volatility may come in higher or lower than expected. Past performance does not predict future returns. Diversification does not eliminate the risk of experiencing investment losses.

There is a risk of substantial loss associated with trading commodities, futures, options, derivatives and other financial instruments. Before trading, investors should carefully consider their financial position and risk tolerance to determine if the proposed trading style is appropriate. Investors should realize that when trading futures commodities, options, derivatives and other financial instruments one could lose the full balance of their account. It is also possible to lose more than the initial deposit when trading derivatives or using leverage. All funds committed to such a trading strategy should be purely risk capital.

Please note that the management company may decide to terminate the arrangements made for the marketing of the Fund in any country where it has been registered for marketing.

Broad-based securities indices are unmanaged and are not subject to fees and expenses typically associated with managed accounts or investment funds. Investments cannot be made directly in an index.

Definition: ICE BofAML US 3-M T-Bill Index measures the rate of return an investor would realize when purchasing a single U.S. 3-month treasury bill, holding it for one month, selling it, and rolling it into a newly selected issue at the beginning of the next month.

Where the benchmark is not being used in reference to the management and/or implementation of the investment policy of the Fund, the referenced benchmark is used for the calculation of performance fees and/or as a point of comparison.

The fees and charges paid by the Fund will reduce the return on your investment.

The Investment Manager is entitled to receive a performance fee in relation to certain share classes of the Fund. Please refer to the prospectus to check if a performance fee is charged on your shares and for further detail of the performance fee calculation method. Where charged, the performance fee is calculated in respect of each twelve-month period ending on 31 March of each year ("Calculation Period"). The performance fee calculation methodology applies a high-on-high model, whereby the performance fee may only be charged if the net asset value per share exceeds the net asset value per share at which the performance fee was last crystallised. The performance fee may only be charged if the cumulative overperformance/(underperformance) since the date at which the performance fee was last crystallised is a positive amount. In other words, the methodology incorporates a "loss carryforward" mechanism, meaning that losses carried forward from a previous Calculation Period will have to be recovered before any performance fee becomes payable. The performance fee amounts to 10% of any increase in value of the share class above the relevant hurdle. Negative performance of the hurdle will not be taken into account in calculating the performance fee. The performance fee is crystallised annually on 31 March, or the date when shares are redeemed. The performance reference period (i.e. the time horizon over which the performance is measured and the loss carryforward mechanism applies) corresponds to the whole life of the share class and cannot be reset. Generally, the performance fee is paid to the Investment Manager within 14 business days of the month end in which crystallisation occurs.
