

# Allianz Emerging Markets Equity SRI - IT8 - EUR

Fund for Emerging markets equities with a flexible style

**Allianz**   
Global Investors

Investors should note that, relative to the expectations of the Autorité des Marchés Financiers, this fund presents disproportionate communication on the consideration of non-financial criteria in its management.

## Investment Objective

The fund concentrates on stocks of companies that are domiciled in an emerging market country or that generate a predominant share of their sales or profits in the emerging markets in accordance with the Sustainable and Responsible Investment Strategy (SRI Strategy). Depending on management's assessment of the market situation, it may utilise differing investment styles or combinations thereof. Its investment objective is to attain capital growth over the long term.

## Risks

- High volatility of stocks, losses possible. The volatility of fund unit prices may be strongly increased.
- Underperformance of the Emerging markets countries and from issuers with sustainable practices (SRI) possible
- Underperformance of "Best Styles-approach" possible at times
- Limited participation in the yield potential of single securities
- Success of single security analysis and active management not guaranteed
- Currency losses possible in unit classes not hedged against investor currency

## FOR FUND DISTRIBUTORS AND PROFESSIONAL INVESTORS ONLY

- 1) Calculated at the net asset value, excl. front-end load, distributions reinvested. Calculation according to method as defined by BVI, the German Fund Companies Association. **Any front-end loads reduce the capital employed and the performance.**
- 2) SFDR: EU Sustainable Finance Disclosure Regulation. Information accurate at time of publishing.
- 3) Measure of the proportion of fund assets that is invested differently from the benchmark.
- 4) The dividend yield corresponds to the expected dividend divided by the current price of the share, expressed as a percentage. (eDiv/share price) where: eDiv = product of the last dividend payment and the number of expected dividend payments per year (e.g. the expected dividend for a share with quarterly dividend payment corresponds to the dividend for the last quarter times four). The dividend yield depends both on the amount of the dividend and the current price of the share. Both these key variables may be subject to constant change. The dividend yield is only a snapshot based on the current amount of the dividend and the current share price; **as a result, it is not suitable as an indicator of the future performance of an equity fund.**
- 5) This is for guidance only and not indicative of future allocation.
- 6) If the acquisition of Fund units is subject to a sales charge, up to 100% of such sales charge may be collected by the distributor; the exact amount shall be mentioned by the distributor as part of the investment advisory process. This also applies to any payment by the Management Company of an ongoing distribution fee from the all-in fee to the distributor. The all-in fee includes the expenses previously called management, administration and distribution fees.
- 7) TER generally: Total cost (except transaction costs) charged to the fund during the last financial year. TER for funds-of-funds: The costs incurred by the fund itself (except transaction costs). Since the fund held other investment units ("target funds") in the reporting period, further costs, charges and fees may have been incurred at the level of the target fund.
