Fund Overview

Fund Aspects:

The AQR Apex UCITS Fund⁶ ("Apex") is a multi-strategy portfolio designed to maximize risk adjusted returns while being highly diversifying to traditional markets.

Apex draws on 25 years of research into identifying and measuring market inefficiencies and risk premia, and systematically constructing highly diversified portfolios to capitalize on these fundamental insights.

Apex features AQR's most comprehensive expressions of market neutral stock selection, corporate arbitrage, and global macro. Apex is a dynamic strategy that tactically adjusts risk within and across capabilities in response to long term efficacy, variation in the opportunity set, and changes in the market environment.

Fund Objective:

The Fund seeks to achieve an annual 6% to 8% net of fee and excess of cash return while targeting a volatility level between 6% to 10% in most environments and low correlation to traditional asset classes.

There can be no assurance that the Fund will achieve its investment objective.

Umbrella Fund:

The Fund is a sub-fund of AQR UCITS Funds, a Luxembourg based UCITS of which the management company is FundRock Management Company S.A.

Risk Management:

Risk control is built into the portfolio construction process with a focus on volatility, liquidity, and funding risk management.

Portfolio managers, the Investment Committee and firm-wide Risk Management Department actively assess the risk of the Fund.

Risk and Reward Profile:

Calculated using historical data which may not be a reliable indicator of the Fund's future risk profile. See Key Investor Information Document (KIID) for details.

Share Class Performance (Net) as of 31 Jul. 2025⁴

This shareclass was launched less than 12 months ago, therefore complete performance information cannot be shown at this time.

¹ Holdings subject to change without notice.

² Fees follow a step-down structure. Fees are charged on an investor's net aggregate subscription (subscriptions minus redemptions) vs. a blended weighted average approach.

³ Local Lux Tax per annum of Fund's NAV, payable quarterly.

⁴ Source: AQR, Bloomberg. Past performance does not predict future returns. Returns over one year are annualised. For fees, refer to the Key Information section.

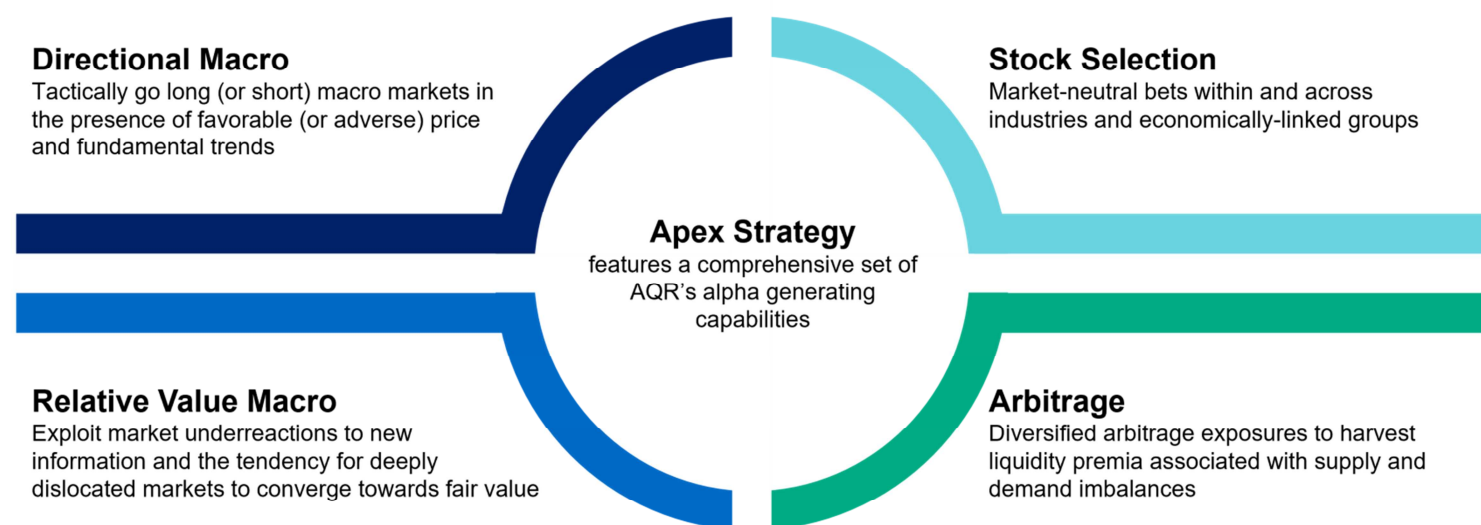

⁵ The Fund is actively managed. The Index is not being used in reference to the management and/or implementation of the investment policy of the Fund, the referenced Index is used for the calculation of performance fees and/or as a point of comparison only.

⁶ Prior to April 25, 2024, the AQR APEX UCITS Fund was formerly named the AQR Systematic Total Return UCITS Fund and was managed under a different investment strategy. The performance data shown is since the conversion to the APEX strategy.

Approved as a Financial Promotion for non-MiFID II regulated activities and for Institutional Investors only.

Fund Characteristics

A Comprehensive set of AQR's Alpha Generating Capabilities

Principal Risks

The Fund may use derivatives in an attempt to reduce risk (hedging) or for investment purposes. It may be that the use of derivatives may not always be successful and cause unit prices to fluctuate which may in turn result in loss to the Fund.

The Fund is exposed to the currency markets which may be highly volatile. Large price swings can occur in such markets within very short periods and may result in your investment suffering a loss.

The Fund may enter into one or more derivatives with a counterparty. There is a risk that this party may fail to make its payments or become insolvent which may result in the fund and your investment suffering a loss.

The Fund may have leveraged exposure to particular investments. A fall in value of such investments can result in a proportionately greater loss to the Fund.

The Fund may invest in less economically developed (known as emerging) markets which can involve greater risks than well developed economies. Amongst other issues, the level of government supervision and market regulation may be less than in more developed economies and could affect the value of your investment. Investment in emerging markets also increases the risk of settlement default.

The Fund may invest in bonds, the value of which depends on the issuer being able to make its payments. There is always a risk that the issuer will fail to do so and this may result in your investment suffering a loss. This risk increases where the Fund invests in bonds which may not be recognised or which are rated below investment grade by major rating agencies or which are backed by more risky assets such as mortgages.

Your investment in the Fund is not guaranteed and is at risk. You may lose some or all of your investment.

The Fund relies upon the performance of the investment manager of the Fund. If the investment manager performs poorly the value of your investment is likely to be adversely affected.

More information in relation to risks in general may be found in the "Risk Factors" section of the prospectus.

The decision to invest in the Fund should take into account all the characteristics or objectives of the Fund as described in its prospectus.

Investment Approach

Apex incorporates the full suite of AQR capabilities across individual stocks, macro, and arbitrage, tilting exposures towards attractive opportunities both within and across these capabilities.

Apex aims to achieve its objectives with a foundation in the following core principles:

Fundamental- Economically motivated investment and research philosophy.

Systematic- Disciplined approach to implementing fundamental ideas.

Diversified- Utilize a broad set of structurally and statistically different return sources.

Capital Efficient- Integrated trading vehicle to allow for meaningful allocation to underlying strategies.

Evolutionary- Continuous investment in enhancing the information set, methods, and implementations.

Risk Managed- Emphasis on risk management at every level of the portfolio.

Apex incorporates the full suite of AQR’s capabilities:

Directional Macro- Tactically go long (or short) macro markets in the presence of favorable (or adverse) price and fundamental trends.

Relative Value Macro- Relative-value views on macro markets that exploit market underreactions to new information and the tendency for deeply dislocated markets to converge towards fair value.

Stock Selection- Relative-value bets within industries, within economically linked groups, and across industries that span ~5,000 developed and ~1,000 emerging stocks across different geographies and market caps.

Arbitrage- Diversified arbitrage exposure across mergers, converts, and event driven strategies.

Each capability is comprised of numerous sub-strategies, representing different expressions of views in different sets of markets (e.g., developed currency selection within relative value macro). Tactical risk taking is embedded in the investment process. Apex varies capability and sub-strategy risk according the opportunity, upweighting risk when signal strength and agreement is high and downweighting risk when signal strength and agreement is low.

Company Profile

At a Glance:

AQR is a global investment management firm dedicated to delivering results for our clients. At the nexus of economics, behavioral finance, data and technology, AQR’s evolution over two decades has been a continuous exploration of what drives markets and how it can be applied to client portfolios. ⁷ Approximate as of 31 Jul. 2025. Includes assets managed by AQR and its advisory affiliates.

Disclosures

This is a marketing communication. Please refer to the Prospectus, KIID and (where applicable) KID for more information on general terms, risks and fees. Investors should only invest in the Fund once they have reviewed the Prospectus, KIID and (where applicable) KID, the most recent versions are available free of charge, in English and in your local language at AQR UCITS Funds, c/o HedgeServ (Luxembourg) 4th Floor, K2 Forte, 2-2a Rue Albert Borschette, L-1246, Luxembourg, along with the annual and semi-annual report and articles (each in English). Investors may wish to consult an independent financial advisor for personal and specific investment advice before investing. Only the information provided in the Prospectus and the KIID is legally binding. Not all share classes are available for investment in all countries. The Prospectus as well as a summary of investor rights are available in English. The relevant KIID is available in Danish, Dutch, English, French, German, Icelandic, Italian, Norwegian, Spanish, Swedish, and depending upon the specific fund, Greek and Portuguese. These documents are available at: <https://ucits.aqr.com/>.

The information set forth herein has been obtained or derived from sources believed by AQR Capital Management, LLC ("AQR") to be reliable. However, AQR does not make any representation or warranty, express or implied, as to the information's accuracy or completeness, nor does AQR recommend that the attached information serve as the basis of any investment decision. This document has been provided to you solely for information purposes and does not constitute an offer or solicitation of an offer, or any advice or recommendation, to purchase any securities or other financial instruments, and may not be construed as such. This document is intended exclusively for the use of the person to whom it has been delivered by AQR and it is not to be reproduced or redistributed to any other person.

This document is not research and should not be treated as research. This document does not represent valuation judgments with respect to any financial instrument, issuer, security or sector that may be described or referenced herein and does not represent a formal or official view of AQR.

The views expressed reflect the current views as of the date hereof and AQR does not undertake to advise you of any changes in the views expressed herein. It should not be assumed that AQR will make investment recommendations in the future that are consistent with the views expressed herein, or use any or all of the techniques or methods of analysis described herein in managing client accounts. AQR and its affiliates may have positions (long or short) or engage in securities transactions that are not consistent with the information and views expressed in this document.

The information contained herein is only as current as of the date indicated, and may be superseded by subsequent market events or for other reasons. Charts and graphs provided herein are for illustrative purposes only. The information in this document has been developed internally and/or obtained from sources believed to be reliable; however AQR does not guarantee the accuracy, adequacy or completeness of such information. Nothing contained herein constitutes investment, legal, tax or other advice nor is it to be relied on in making an investment or other decision.

There can be no assurance that an investment strategy will be successful. This document should not be viewed as a current or past recommendation or a solicitation of an offer to buy or sell any securities or to adopt any investment strategy.

The investment strategy and themes discussed herein may be unsuitable for investors depending on their specific investment objectives and financial situation. Please note that changes in the rate of exchange of a currency may affect the value, price or income of an investment adversely.

No representation or warranty, express or implied, is made or given by or on behalf of AQR or any other person as to the accuracy and completeness or fairness of the information contained in this document, and no responsibility or liability is accepted for any such information.

There is no guarantee, express or implied, that long-term return and/or volatility targets will be achieved. Realized returns and/or volatility may come in higher or lower than expected. Past performance does not predict future returns. Diversification does not eliminate the risk of experiencing investment losses.

There is a risk of substantial loss associated with trading commodities, futures, options, derivatives and other financial instruments. Before trading, investors should carefully consider their financial position and risk tolerance to determine if the proposed trading style is appropriate. Investors should realize that when trading futures commodities, options, derivatives and other financial instruments one could lose the full balance of their account. It is also possible to lose more than the initial deposit when trading derivatives or using leverage. All funds committed to such a trading strategy should be purely risk capital.

Please note that the management company may decide to terminate the arrangements made for the marketing of the Fund in any country where it has been registered for marketing.

Broad-based securities indices are unmanaged and are not subject to fees and expenses typically associated with managed accounts or investment funds. Investments cannot be made directly in an index.

Definition: The €STR measures the rate of return an investor would realize when purchasing a single U.S. 3-month treasury bill, holding it for one month, selling it, and rolling it into a newly selected issue at the beginning of the next month.

Where the benchmark is not being used in reference to the management and/or implementation of the investment policy of the Fund, the referenced benchmark is used for the calculation of performance fees and/or as a point of comparison.

The fees and charges paid by the Fund will reduce the return on your investment.
