

Investment Objective

The US Stars Equity fund seeks to generate long term capital growth by investing in a concentrated portfolio of American companies with enduring competitive advantages and a long runway of growth.

We select companies based on our own fundamental research, taking a long-term investment horizon. We do not follow benchmarks and always invest in quality.

Quality for a company means strong competitive positions, operating in good and growing industries, the financial strength to weather adversity and strong management teams with track records of value creation.

We seek to identify undervalued quality growth companies where the scale or persistence of growth is underappreciated by the market and there is the prospect of significant capital growth.

Performance since launch on 30th Sept 2024 is that of the Fund's A1 USD Share class. Prior to launch Performance is that of J. Stern & Co.'s US Stars Strategy, a simulated or hypothetical portfolio, that has been a standalone strategy since 1st June 2023, unhedged, which the Fund follows. Since 1st October 2012 performance is total return (with dividends reinvested) and net of 1% fees per annum, deducted 0.25% quarterly in arrears. Prior to 1st June 2023 (and from inception on 1st Oct 2012) performance is that of the US primary listed holdings of the World Stars Global Equity Strategy (and so without any allocation to cash), with performance reduced by 0.25% quarterly in arrears to represent 1% fees per annum. Past performance is not a reliable indicator of future results; the value of any investment can fall as well as rise; and returns may increase or decrease as a result of currency fluctuations. The MSCI USA NTR is designed to measure the performance of the large and mid-cap segments of the US market. With 593 constituents, the index covers approximately 85% of the free float-adjusted market capitalization in the US. Source: Factset, Wize, Bloomberg, J. Stern & Co. As at 31st October 2025.

Portfolio Comment

The US Stars portfolio returned 3.2% during the month, outperforming the broader market, which rose 2.4%. The US market continued its rally, supported by encouraging earnings results and an easing in trade tensions.

In October, the strongest performer in the portfolio was *Intuitive Surgical*. The company reported an excellent set of earnings, with both procedure volumes and installations of its flagship DaVinci 5 systems exceeding expectations. Intuitive also raised its gross margin outlook, aided by improved sourcing, lower tariff assumptions and more efficient production. We continue to view Intuitive Surgical as the leader in robotic surgery, with a long runway of growth ahead.

Lam Research also performed well, exceeding expectations and raising guidance after its results. The company is benefitting from strong demand in the memory industry, and consequent higher spending on semiconductor equipment. The company is also set to benefit from the increased investment in AI infrastructure and strong demand for semiconductor equipment spend.

Amongst the weaker performers, *Intercontinental Exchange* lagged as the company gave subdued commentary around the US housing market. Management indicated that they expect 2026 to be a relatively slower growth year for the mortgage technology business.

Meta delivered strong growth in Q3, but pointed to slower progress in Q4. Nevertheless, we believe that the outlook is very robust and that Meta is well placed to benefit from the ongoing AI revolution.

There was no portfolio activity during the month.

We remain confident in the outlook for the US Stars portfolio, which we believe is well-positioned to capture long-term secular growth opportunities in the market.
