You are about to purchase a product that is not simple and may be difficult to understand.

What is this product?

Type

This product is a share of a compartment (the "Sub-Fund") of an investment company authorised as a Reserved Alternative Investment Fund (RAIF) under Luxembourg law (the "Fund") in the form of a Société d'Investissement à Capital Variable (S.I.C.A.V).

Term

The Fund has no maturity date. Notwithstanding this provision, the Fund may be dissolved at any time by a resolution taken by the general meeting of shareholders.

Objectives

The Sub-Fund aims to generate stable, long-term, uncorrelated returns by investing primarily in unsecured bonds issued by an affiliate of Mikro Kapital. Proceeds are on-lent to micro, small, and medium-sized enterprises across Europe, Eastern Europe, Asia, and Africa, fostering financial inclusion and job creation while seeking consistent performance. The Sub-Fund integrates ESG assessments to promote responsible, sustainable outcomes and may use derivatives for hedging. It is open-ended but imposes a 12-month lock-up and a 6-month redemption notice.

Intended investor

The Sub-Fund is suitable for well-informed investors within the meaning of article 2 of the Luxembourg Law of 23 July 2016 related to reserved alternative investment funds, and have the financial ability and experience to understand, the willingness to accept and the financial resources to withstand the risk of loss inherent to a well-diversified product.

Other information

Depositary: Banque de Patrimoines Privés S.A.

Dividend income: This class is a capitalisation class meaning that income is reinvested.

Conversion right: The investor may have the right to convert his investment in shares in one sub-fund for shares in the same sub-fund or in another sub-fund. The investor can obtain information about how to convert in the prospectus of the fund.

Segregation: The assets and liabilities of a sub-fund are segregated pursuant to the law so that the commitments and liabilities of one sub-fund do not affect the other sub-funds.

Additional information: Additional information about the fund, copies of its prospectus, the latest annual and semi-annual report and the latest prices of shares may be obtained free of charge from the management company or on www.mcsquare.lu. The prospectus and the periodic reports are prepared for the entire Fund and are available in English. The management company may inform you about other languages in which these documents are available.

What are the risks and what could I get in return?

Risk Indicator

The Recommended Holding Period of the product is 5 years. The actual risk can vary significantly if you cash in at an early stage and you may get back less.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because the Fund is not able to pay you. We have classified this Fund as 3 out of 7, which is a medium-low risk class. This rates the potential losses from future performance at medium-low level, and poor market conditions are unlikely to impact the Fund's capacity to pay you. **Be aware of currency risk. You will receive payments in a different currency, so the final return you will get depend on the exchange rate between the two currencies. This risk is not considered in the indicator shown above.** This product does not include any protection from future market performance so you could lose some or all of your investment. If the Fund is not able to pay you what is owed, you could lose your entire investment. Other significant risks relating to the Sub-Fund which are not included in the summary risk indicator are set out in the Prospectus.

Performance Scenarios

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted. The unfavourable, moderate and favourable scenarios shown are illustrations using the worst, average and best performances of the product over the last 10 years, by identifying, depending on the performance scenarios and as defined in Regulation (EU) 2021/2268, all overlapping sub-intervals individually (i) equal in length to the recommended holding period which start or end in each month which are contained within that period of 10 years or (ii) equal or shorter in length to the recommended holding period, but equal to or longer than 1 year, which end at the end of that period of 10 years. Markets could develop very differently in the future.

Unfavourable: this type of scenario occurred for an investment between December-2023 and December-2024.

Moderate: this type of scenario occurred for an investment between January-2017 and January-2022.

Favourable: this type of scenario occurred for an investment between December-2014 and December-2019.

The stress scenario shows what you might get back in extreme market circumstances.

Performance Scenarios

Example investment: 10,000 EUR (€)		If you exit after 1 year	If you exit after 5 years (recommended holding period)

What happens if MC Square S.A. is unable to pay out?

You may face a financial loss if the Sub-Fund is unable to return your investment due to poor performance. The Investment Manager and the Manufacturer of this product have no obligation itself to pay out since the product design does not contemplate any such payment being made. Any loss you do suffer as a result of actions of the Manager or the Sub-Fund is not covered by an investor compensation or a guarantee scheme.

What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

Cost over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does (where applicable). The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- In the first year you would get back the amount that you invested (0% annual return). For the other holding period we have assumed the product performs as shown in the moderate scenario;
- 10,000 EUR (€) is invested.

Investment 10,000 EUR (€) Scenarios	If you exit after 1 year	If you exit after 5 years (recommended holding period)
Total costs	184.80	1 152.40
Annual cost impact*	1.85%	1.95%

(*) This illustrates how costs reduce your return each year over the holding period. For example, it shows that if you exit at the recommended holding period your average return per year is projected to be 5.30% before costs and 3.35% after costs.

We may share part of the costs with the person selling you the product to cover the services they provide to you. They will inform you of the amount.
