## What is this product?

### Type

This Fund is an open-ended public limited company (société anonyme) with variable capital (société d'investissement à capital variable or SICAV) which was incorporated in Luxembourg on 22 September 2008 under registration number B141.816 and is authorised by the CSSF as a UCITS.

### Term

The Company is an open-ended public limited company incorporated for an unlimited period. However, it may be dissolved at any time by a resolution passed at a general meeting of Shareholders adopted in compliance with applicable laws.

This Fund has no maturity date. However, it may be terminated and liquidated by the decision of the Board under specific conditions set forth in the Prospectus.

### Objectives

**Investment objective** The objective of the Fund is to track the performance of the global government bond market.

The Fund is an index tracking fund (also known as a passively managed fund).

**Investment policies** The investment policy of the Fund is to track the performance of the Bloomberg Barclays Global Treasury Bond Index (or any other index determined by the Directors from time to time to track substantially the same market as the Index) as closely as possible while seeking to minimize as far as possible the tracking difference between the Fund's performance and that of the Index.

The Index measures the performance of the global government bond market. Securities must be fixed rate and rated investment grade as defined by the Index methodology.

The Investment Manager, on behalf of the Fund, will invest using the Stratified Sampling Strategy as further described in the "Investment Techniques" section of the Prospectus, primarily in the securities of the Index, at all times in accordance with the investment restrictions set forth in the Prospectus. The Investment Manager also may, in exceptional circumstances, invest in securities not included in the Index but that it believes closely reflect the risk and distribution characteristics of securities of the Index.

In order to achieve its investment objective, this Fund will only invest in:

- Government and government-related bonds; The Fund may invest in China bonds acquired on the CIBM through the CIBM Direct Access Programme;
- Other funds;
- Liquid assets; and
- Derivatives for efficient portfolio management, limited to forward foreign exchange contracts, futures, options and swaps.

The Fund may purchase securities that are not denominated in U.S. Dollar. If it does so, the Class S EUR Portfolio Hedged Distributing Shares could have losses due to changes in the exchange rate between the U.S. Dollar and other currencies the Fund's investments are denominated in. The Fund may use financial derivative instruments (that is, financial contracts whose prices are dependent on one or more underlying assets) to seek to limit the losses that could arise from this currency exposure.

This EUR Hedged Class is made available to reduce exchange rate fluctuations between the currency of this Share Class and the currency in which the underlying assets of the Fund are denominated. The Share Class will be hedged back to EUR and consequently should more closely track the corresponding hedged version of the Index (Bloomberg Barclays Global Treasury Bond Index).

The Fund may lend up to 70% of the securities it owns.

The Shares of the EUR Class are issued in Euro.

Shareholders may redeem shares on any Luxembourg and UK business day (other than days on which relevant financial markets are closed for business and/or the day preceding any such day provided that a list of such closed market days will be published for the Fund on [www.ssga.com](http://www.ssga.com)); and any other day at the Directors' discretion (acting reasonably) provided Shareholders are notified in advance of any such days.

Any income earned by the Fund will be paid to shareholders in respect of the shares.

**Index Source:** The Index is the intellectual property of the Index provider. The Fund is not sponsored or endorsed by the Index provider. The Index provider does not provide any warranty or accept any liability in relation to any error relating to the Index, including any error in respect of the quality, accuracy or completeness of Index data, and does not guarantee that the Index will be in line with the described Index methodology. Please see the Prospectus for the full index disclaimer.
